Thread: [\[SOURCE\] All in 1 Media Player\(photos, audio, video, GIF's etc.\)](#)

Doga - August 19, 2012, 2:32 am

Hey HF,

I was getting kind of bored so, I thought making something...

Now, I made something like all-in-1 Media Player...

This is usual stuff but still if someone in need of similar code can have a look at it and I don't want to waste the hardwork to Recycle-Bin so, I post it here...

What it does...

Can open

Images (bmp, jpg, png, gif) also 'set as background' option

Music (mp3, wav, wma, aif etc.)

Video (mpg, avi, wmv, mp4, 3gp etc,) Fullscreen option...

Here is the pic:

Good Job seems awesome keep it up gui needs a little work though

marvinn - August 19, 2012, 2:52 am

Please upload some pictures of the product you've been working on. I want to see the GUI :)

Doga - August 19, 2012, 2:58 am

Yup sure right on boss, don't get scared... check the main post...
