Thread: [\[HOT -FREE STUFF\]Free Crypters \(80 Crypters no Shareshit\)\[HOT FREE STUFF\]](#)

n1c3t34 - August 19, 2012, 7:32 am

Hello guys out there,

i think its very annoying if you have to pay for crypters, not that i disrespect the work of the writers, but i think there should be some free ones. So i went ahead and searched for crypters.

Now im here with a huge list and just want to share it with you guys.

Actually i had no virus but i used cain.exe for scan

Detection ratio: 15 / 39

Here a few examples:

with !epack crypter

Detection ratio: 6 / 39

File name: azprotect.exe

Detection ratio: 7 / 41

I need to say that the various scanners detect the hash of cain and say that its a virus automatically.

If you program your virus at your own or use a program to create it, it shouldn't be a problem :)

Here is the dl link with a pack of 80 crypters(no shareshit):

For n00bs: don't download this cus there could be some viruses in the pack.

np guys

@Mesih ... go in a corner , shame on you!

Hades10 - August 20, 2012, 5:36 am

I gonna try them....

Thank you for the share!

can anyone verify these arent backdoored

uber10n9 - August 20, 2012, 9:37 am

Yea i ran a few in sandbox, i didn't try all of them but on certain, i think it's safe to use, for best, just run in sandbox and recover your server to a certain destination

n1c3t34 - August 21, 2012, 7:01 am

yeah uber10n9 i think ur totally right!

kickerbat - August 21, 2012, 7:10 am

VIRUS!! Searched and destroyed, fail.

If you sandbox the program and monitor with wireshark you can see it's backdoored.

Most free crypters doesn't keep your stub fud for long.

Mr. Robot - September 27, 2015, 9:45 am

OP posted a link blocked by HF - do not download these.

Why the fuck was this grave dug lmao.

Do not download. It is more than pointless. The thread is from 2012.

blackice09 - November 29, 2015, 6:30 pm

Thank you very much for that!

tim20g - August 23, 2016, 6:21 am

To much of this crypters are infected!
