Thread: [E-whoreing - a basic tutorial with updated packs.](#)

What is E-whoring?

Other threads of mine of interest:

[How to torrent anonymously](#)

[How to be anonymous online](#)

[How to secure your phone](#)

E-whoring is posing on the internet as a woman and trying to get money by exploiting them in different ways.

Requirements: [\(Click to View\)](#)

Manycam

Messenger to communicate on such as yahoo, msn etc..

Picture pack

Videos

After you have that set up you will need to know that when you E-whore part of the success is in learning how to type like a woman, so I suggest watching a woman's writing and learning how to replicate it if possible.

Ways you can make money:

Sell pictures of "yourself"

Gain sympathy by manipulation, need money for school and such

Others I cannot mention

Free VPN's:

<http://hotspotshield.com/>

<http://www.x10vpn.com>

<http://www.easy-hide-ip.com/download> - 3 day free trial

I highly recommend using a paid VPN, a vpn I use is: [?NIGMA VPN](#)

I don't always post weird posts like this one, but when I do it's because OP is legendary. ?

Good guide, but you know posting tutorials is fucking up e-whoring by making it more saturated by skids..., ah I guess that's how the cookie crumbles...

I disagree, all of the information I have added is very basic and I could not go into detail about some of the other aspects.
