Thread: [\[TuT\] SPREADING!!!! 1000s OF SLAVES IN Days \[TuT\]](#)

???? - August 20, 2012, 6:13 am

This might be the wrong section if it is in the wrong section can someone tell me the correct section.

Okay i might have lied about 1000s it is possible for you to get 1000s of slaves with this method.

first find a botnet that you like.

once you have set up your botnet next thing your gonna do is build the file for bots 'don't remember the name'

make sure you have a crypter that's FUD if you don't have one and need something crypted you can leave a comment saying you need this file crypted please leave a message with your skype name.

and i'll crypt it but make sure your crypter is FUD and has an option where you can change the icon of the file, i will be providing you the links to the icons needed in this tutorial.

these icon's are not mine i did make them and i am not making any profits of using them.

Download Link: <http://uppit.com/kpfh18lhh4bp/icons.rar>

Next step is to either get a youtube downloader and make a new youtube account something like BLACKOPSMODDER or something like mods or anything you would like to use.

then your gonna find a youtube video with the least views of a xbox zombie game of mods being used, if you have actual mods for black ops zombies or you have downloaded black ops online for your pc like i have you can record a video of you playing like kino by your self using mods on that i have done.

but if you don't have that just take a video with the least views on youtube and upload it to the youtube channel you had made,

with the icons it makes it look nicer and more click able and you can always use utorrent to spread it too.

i know this isn't the greatest tutorial but it has been successful for me and i hope it will be for you.

ENJOY, please comment. ? and happy spreading.

EDIT: forgot to add this it works alot better if you make multiple youtube channels, and get multiple different zombie mod videos

You'd be lucky to get 100 bots a month with this method.

I would like to suggest that Black ops is old and you should prepare for the future by makeing a fake program that edits stats on black ops 2 after that upload a video of you using it but make the video private until the game comes out then put the download to the fake program in description ether have your bot binded to it or make the setup for the program install the bot and boom you will get a decent amount of bots for youtube maybe more if your spread on game sites like ttg se7ensins.. just an idea but has worked before .. hope i help and hope you all get what your all wanting
