Trusted - Secure - FastTrusted - Secure - FastTrusted - Secure - FastTrusted - Secure - Fast

Not2EXceL - August 21, 2012, 7:43 pm

Seems like this is for c++ homework. Both of those programs are simple to write, with very little c++ experience. Please elaborate more why you need these two programs. If its homework, I'm willing to assist you, but not give you the entire program.

Tenacious - August 21, 2012, 7:54 pm

I'll teach you how to do it over skype/msn if you'd like

Add me:

skype = xenbooter

msn = xenbooter@outlook.com

I prefer msn but fine with either

POSIX - August 21, 2012, 7:55 pm

Could somebody re-write MHC's post? I would be more than happy to write the two programs for him, but sadly, I can hardly understand him.

Do you not speak English, or are you just illiterate? Most teenagers these days don't even make an effort to write grammatically correct sentences. >.<

Program #1: Code Input: 14

Output:

Since you have? 14, then you are born ... <enter>

Since you have? 13, then you are born ... <enter>

Since you have? 12, then you are born ... <enter>

[...]

Since you have? 1, then you are born ... <enter>

Program #2: Code Input: 2

Output:

I like to program in Visual C + +.

I like to program in Visual C + +.

Are those correct?

MHC - August 21, 2012, 8:13 pm

Yeah its for home work, I have no idea how to start the program and all... :/

POSIX - August 21, 2012, 8:25 pm

>_< That's not a problem. I just need you to rephrase your original post because I don't understand it.

Dr.Coder ? - August 21, 2012, 8:31 pm

Lol, he is in programming classes and he can't even use "for" condition...

Btw, your english really sucks

Greystersting - August 21, 2012, 8:32 pm

Don't be an ass. They are willing to help you with your homework because you are too stupid to do it yourself. Be grateful.

notsteve - August 21, 2012, 8:35 pm

The only reason I'm doing these is because it took < 1 minute and to show you how ridiculously easy it is. Study more. If you use these without looking at them, prepare to fail your class if you don't review your textbooks, not learning simple stuff like this will end you up without a job.

prog1:

```
Code #include <iostream>
```

```
using std::cout;
```

```
using std::cin;
```

```
int main()
```

```
{
```

```
    unsigned int age;
```

```
    cout << "What is your age? ";
```

```
    cin >> age;
```

```
    cout << std::endl << "Since you are " << age << " years old, you were born in " << 2012 - age;
```

```
    cin.get();
```

```
    return 0;
```

```
}
```

prog2

```
Code #include <iostream>
```

```
using std::cout;
```

```
using std::cin;
```

```
int main()
```

```
{
```

```
    unsigned int times;
```

```
    cout << "How many times would you like this sentence repeated?: ";
```

```
    cin >> times;
```

```
    for(int i = 0; i < times; i++)
```

```
        cout << std::endl << "I like to program in visual c++";
```

```
        cout << std::endl << "I'm a leecher from hackforums.net";
```

```
    cin.get();
```

```
    return 0;
```

```
}
```
