Thread: [Would anyone here buy a java BruteForcer?](#)

TomTehGamer - August 22, 2012, 8:01 am

Yeah as the title says, please reply below?

redpois0n - August 22, 2012, 8:38 am

Bruteforce what? There is many things to bruteforce lol

Impuhsive - August 22, 2012, 8:40 am

What capabilities or outputs does it have?

Jmw - August 22, 2012, 8:44 am

It depends what it can bruteforce, give us more information.

Depends on what ..

```
Code String f = " 35 chars";  
f= " fuck you";
```

Widow's Peak - August 22, 2012, 8:47 am

If you're making a bruteforcer in java, you're either really stupid or think that everyone here is.

redpois0n - August 22, 2012, 10:28 am

Now tell me why you think so.

I do not understand what is wrong with this.

Please explain why you feel this way. It IS possible.

ayyy lmao000o - August 22, 2012, 10:52 am

Well, I was working on a project a while back, which allows you to set the url, and url variables, and set html detection for certain events.

clearly you don't know the power of what java can achieve a bruteforcer would be possible and probably very easy.

L2google pl0x.

He's not saying it's impossible. He just doesn't think Java is a very good language to use. I agree, I think it would make a pretty inefficient Brute Forcer compared to like C or something.

(Aug 22, 2012 08:47 AM)Dr. Gregory House Wrote: [\[CITE\]](#) If you're making a bruteforcer in java, you're either really stupid or think that everyone here is. On which base you are saying this?

Think..

?

Shady ^_^ - August 25, 2012, 3:04 pm

In my opinion, C is overused and overestimated. Few people use Java today's compared to the C/C# users.

On topic: A brute force in Java would probably be effective but I don't think you could earn that much in it, unless you add some special features/tweaks to it.
