Edward Snowden. - August 22, 2012, 6:07 pm

Hello , I'm offering my 1st service in this section;

I'm offering to crypt your server with a no-dependencies crypter and the output will be FUD , I will scan it on a no-redistribution System and during the whole processus ill show you my Screen via TeamViewer or skype screen share.

The price range can go from 1 to 5 \$ per crypt but the price can be fixed while chatting.

What may vary the price ?

-Features mainly.

-.net or no dependancy crypt.

1st One to post get a free crypt !

Skype : Gabriel.Hamelin2

Spoiler ([Click to View](#))

Reason For Edit : Forget To Add Price Range -.- (my 1st post remember , my 1st post...)
