Thread: [Can some one help me port forward Useing \[nVPN\]](#)

Rango - August 23, 2012, 10:15 pm

Hey Everyone, just wondering if someone could help me Port forward useing nVPN, i have tried and it just not working out, I would prefer that you do this over Team viewer..

PM if you can help please! ;)

cybernetiks - August 23, 2012, 10:35 pm

Hey Rango, i think you should check your router if you have access to one.you can pre-set portforwarding from there. else, try here;

Hello,

Port forwarding nVPN is so easy :)

Just log in to your account on their website and go to "Port forward", then type in the number of port you want to port forward and click "add", thats all, is it so hard ? ;)

It is not necessary to port forward via my router?

Only at nVpn?

Rain\$ - September 3, 2013, 6:37 am

You only need to port forward on nVPN. Its very simple.

El_Panos - September 3, 2013, 6:39 am

I do that.

But what i go to canyouseeme.com it says that the port it is not open.

Try to disable your Windows firewall, and try again. The firewall could block it.

If that dosent work, try to run nVPN as admin and portforward again. I havent tried nVPN before so Im not sure...

Also after you disable your firewall and windows defender it is a must that you restart your PC
