Legion | How to mess with your friends with Facebook

Hello, this is my first guide in 2 months since I just got unbanned. Please leave a comment saying thanks or any questions.

Lets begin; The method im about to tell you is not for any illegal things just to simply mess with your mates.

1) Find out what email your friend 1 uses to sign into facebook with:
e.g Robbie@hotmail.com

2) Find a second friend (Friend 2)
e.g Joise@facebook.com

3) Use a email 'spoofer' and fill out the details below

From: put your friend 1 email here

Robbie@hotmail.com

To: put your friend 2 email here

Joise@facebook.com

Subject: Nothing

Message: Anything you want, something like

'I love you". Really it can be anything!

4) Enjoy, your friends will think their facebook got hacked!

Info:

Friend 1 will not see the message in there chat box.

Friend 2 will see the message, but there will be a little 'mail' box next to it. Saying "Sent from *(Email)*"

Jmw - August 24, 2012, 2:58 am

Thanks mate, are there any free email spoofers?

7ewis - August 24, 2012, 4:41 am

I have some Email Spoofers hosted on a site that I don't use, they're not pretty or anything though; just hosted them there in case I wanted to spoof something.

Feel free to use them:

(Basic) <http://donotvisit.co.cc/emailspoofer.php>

(Advanced) <http://donotvisit.co.cc/advancedspoofer.php>

Edit: The Advanced one is working at the moment; I never really used it anyway. Will try and get it back up, the basic will should work fine though.

Dialga - August 24, 2012, 4:43 am

Wow. This is funny. I will try this. Thanks.

Will we be able to see the message sent to the person when he/she messages back to the message?

Just to tell You that i have used my Email spoofer and none of them works. Gmail filters all spoofed emails.

Can you tell me any email spoofer that works even with a gmail.?

Thanks in advance.

Prince™ - September 19, 2012, 2:21 am
