Thread: [? nVpn mega tut if you use openvpn read this ?](#)

Black Shadow - August 24, 2012, 11:02 am

Are you fed up with having to put your username and password into your client every time you log on, I know it can be a pain if your logging in and out of it constantly, well the good news is you don't have to anymore check this out..

First of all open the .ovpn file and add the word password.txt

After you close the ovpn file, open notepad and type in your username and pass.

Save the txt file that you have put your username and password in to the config folder.

Thats it your good to go ?

Gamekilla - August 24, 2012, 11:03 am

Nice tut wish I still had nvpn. ?

Robert Nesta Marley - August 24, 2012, 5:09 pm

Helped me allot, I was having to manually enter the username/password everytime I wanted to connect to the VPN which was pretty annoying. Thanks for the heads up !

Black Shadow - August 31, 2012, 1:32 pm

I am disappointed that I got only 2 reply's this is an amazing find ?

Heisenberg™ - August 31, 2012, 2:30 pm

and may have a way to free vpn ??friend nvpn.net? thanks

Rafe_D - September 2, 2012, 3:03 am

Thanks Black Shadow. That's a very handy little tip to know.

RenegadeDK - September 2, 2012, 6:34 pm

A good tip indeed, thx Black Shadow!

Chelsea Monday - September 15, 2012, 12:55 am

This is pretty cool.Just got nVPN, so will try this out ASAP.

Hesco - September 15, 2012, 3:26 am

Thanks for the tut will avoid wasting time from next time.

cybergh0st - September 16, 2012, 1:56 am

Wish I could actually find the .ovpn file on my pc

I guess I will just have to carry on typing in login/pass manually

Nice find though:)

Black Shadow - September 16, 2012, 12:47 pm

I found it, thanks!!

I couldn't find it because I get frustrated to easily?

Reward - August 14, 2014, 10:09 am

I tried this and it wont let me save the ovpn file after?

Altidore - August 14, 2014, 11:48 am

(Aug 14, 2014 10:09 AM)Reward Wrote: [\[CITE\]](#) I tried this and it wont let me save the ovpn file after? You got windows related permission problem.

Save it on desktop first and then MOVE it from there into the config folder, that works.

ramiz123 - August 18, 2014, 4:13 pm

thanks this helped me alot...appreciate it brah

74mb0r1n3 - September 29, 2014, 3:59 am

thanks for this man, really needed it

magicslurp - September 29, 2014, 1:24 pm

works like a charm thanks for this nice tip

Black Shadow - December 15, 2014, 12:38 pm

This is old but its a good tutorial to use, saves logging in all the time.

JackofSpades707 - December 15, 2014, 1:08 pm

does this work with 143vpn?

/char limit

Black Shadow - December 27, 2014, 5:22 am

(Dec 15, 2014 02:08 PM)JackofSpades707 Wrote: [\[CITE\]](#) does this work with 143vpn? /char limit

If it uses the open VPN client then yes it will work.

G^aNNIcus - December 28, 2014, 11:39 am

I stumbled on this....DAMN....wish i knew about this sooner....

Thanks

Acquire Zion - July 26, 2015, 12:05 pm

Thanks for this tutorial man, im sure it will lead to many saved seconds ;)

CCHrambo - July 26, 2015, 12:07 pm

How would you set this up if you had multiple connections with different usernames and the same password?

Altidore - July 26, 2015, 10:27 pm

(Jul 26, 2015 12:07 PM)CCHrambo Wrote: [\[CITE\]](#) How would you set this up if you had multiple connections with different usernames and the same password?

Same logic, multiple connections mean multiple config files and in each config file, you simply set a different "password.txt" file, for example:

1st account config file: auth-user-pass password1.txt

2nd account config file: auth-user-pass password2.txt

3rd account config file: auth-user-pass password3.txt

And logically in each passwordX.txt file you use different username / password combination, that way you can connect to each account automatically and that even with multiple accounts.

Black Shadow - December 9, 2015, 5:04 pm

This is great my old openVPN thread I needed to find this again as setting up my VPN.

Whxami - December 11, 2015, 1:28 am

I am getting the "Could not connect to user" when i try it.

Black Shadow - December 11, 2015, 9:56 am

(Dec 11, 2015 02:28 AM)Serj Tankian Wrote: [\[CITE\]](#) I am getting the "Could not connect to user" when i try it.

You are doing something wrong as its working perfect for me

Were it says user and password in the text file you put your username and password example below

Do not type the words "username or password"

Do it like this

pete656

67ytgy65tr54

Whxami - December 11, 2015, 4:37 pm

Thats what i did:

i opened my open vpn config file and edit it with notepad++ and i put password.txt like in the op then i make a password.txt file in the config file and put my user info

Black Shadow - December 11, 2015, 8:23 pm

(Dec 11, 2015 05:37 PM)Serj Tankian Wrote: [\[CITE\]](#) That's what I did:
I opened my openvpn config file and edited it with notepad++ and I put password.txt like in the OP
then I made a password.txt file in the config file and put my user info
Open the config file with notepad not notepad++ as it doesn't save it.

musther_G - December 12, 2015, 8:47 pm

Thanks Black Shadow
you are saving my time .. very detailed explanation.. working perfectly
