Thread: [Clean looking fonts?](#)

zetta - August 25, 2012, 4:29 am

Hey HF!

I'm looking for some clean looking fonts for a new signature, maybe some of you can suggest some?

It should be a font with small letter's.

example: The "E" is the small --> e, and not the big --> E.

And ofc. the same with the other letters in my name 'zetta'.

If some of you possibly knows which font this is, please write the name of it, or share me a dl link to it.

Thanks in advance!

I'm not quite how clean you want the fonts to be, so here's a selection of my favourite lowercase-only fonts:[br]

It's not simple... Okay, an example for a simple font:

<http://fontleech.com/images/tuffy.png>

Like clean lines, and no scratches in the text.

Thanks for trying!:D

the A looks like the A from transformers(in the one you linked) and the rest could easily be Bebas or something.
