Thread: [Poseidon Bot Source-Code \[ Delphi, HTTP Bot, Best HTTP Bot on HF \]](#)

Coiner - August 25, 2012, 9:52 am

I will keep this short - I don't give a shit that i don't have a pretty thread like all products here and so on, but my friend asked me to sell his source since he urgently needs money. Price: 3500 LR/WMZ (LR preferred). Please keep in mind, that this is not some low quality HF product, but a bot that was previously sold on OpenSC and russian boards for 550\$/bin.

## Features:

- TCP Flood
- UDP Flood
- HTTP Flood
- Slow post HTTP Flood
- HTTP Download Flood
- SlowLoris Flood
- ARME Flood

\*Poseidon generates random User agents and Referrers during DDos attacks

\*Poseidon can attack many targets at once

\*All attacks are configured through control panel depending on the Poseidon user's needs!

## Stealth/Protection/Startup and other Unique features

--

- Persistence

\*This module works only when RootKit is disabled

\*If server stopped work for some reason persistence module will restore it

- Rootkit x86\*x64 bit

\*Works on both x86 and x64 bit Windows platforms

\*Hide Registry keys

\*Hide Bot process

\*Hide Bot file

- UAC workaround

\*Bot is UAC friendly Smile

- Startup

\*Startup guarantees that your server will still work after restart of victim's pc!

- BotKiller

\*BotKiller scans memory for Bot-activity , destroys any malware which was found.

- Loader

\*Download and Execute file

\*Update File

- Traffic encryption

\*All traffic between panel <> Bot is encrypted using RC4.

Rootkit is split in two parts.  
x86 and x64

x86:

----

DLL injection, uses CreateRemoteThread  
Uses pHook, and BEA LDE32.  
Hooks NtQuerySystemInformation, NtEnumerateKey, NtEnumerateValueKey, NtOpenFile, NtQueryDirectoryFile.

x64:

DLL injection, uses a x64 DLL injector to inject DLL, uses CreateRemoteThread  
Uses pHook64 and BEA LDE64  
Hooks same as x86.

Control Panel Features

--

- Statistics

\*Shows statistics about bots , online bots ,idle bots and etc.

- Sort by Countries

\*You can choose specific countries to send commands (For example Download/execute to Italian bots only)

- Tasks

\*Allows you to set task , which will be executed at specific time

-Logs

\*Provides you logs

Pictures:

<https://imgur.com/nhNCJ,je2z6,kqkXa,00kqC,4eBiE,UhT2Y,95jhB>

Contacts:

- ICQ: blackarray@live.com

- Jabber: blackarray@jabber.org

Please note, if you don't have money up front, please don't bother to contact and don't waste my time. Also i did not code this, just helping out a friend.

If you choose to buy this project, i can assure you that you'll be able to make the money spent back in first week, because the product is top notch and can't be compared to anything sold here on Hackforums.

**Rapier** - August 25, 2012, 9:54 am

Sounds great, Good luck with sales!

**Smokie** - August 25, 2012, 10:09 am

vouch for this bot, Tested it, Its awesome.

**????Chicago Bulls** - August 25, 2012, 10:22 am

Okay, what the fuck makes this worth 3500\$. explain please.

[RuN] - August 25, 2012, 10:28 am

(Aug 25, 2012 10:22 AM)autoit Wrote: [\[CITE\]](#) Okay, what the fuck makes this worth 3500\$. explain please.

sell 6-7 bins then you made your cash back look at the features and its a good bot if you did not know

Coiner - August 25, 2012, 10:42 am

(Aug 25, 2012 10:22 AM)autoit Wrote: [\[CITE\]](#) Okay, what the fuck makes this worth 3500\$. explain please.

IPKiller was sold for 2000\$ (source-code)

This is a lot hell better coded and far more efficient than IPKiller and its only 1,5k more.

Read the feature list, sir.

@English he doesn't want to sell bins anymore, i don't know why, he asked me to sell source.

Rapier - August 25, 2012, 11:01 am

But i think what the user was getting at is How do we know these features work and no one will buy \$500 bins here on HF LOL.

Coiner - August 25, 2012, 11:07 am

(Aug 25, 2012 11:01 AM)Rapier Wrote: [\[CITE\]](#) But i think what the user was getting at is How do we know these features work and no one will buy \$500 bins here on HF LOL.

I am not selling bins. Source-code only. Proof can be given, but only if the user has money - i am not going to waste my time.

Rapier - August 25, 2012, 11:09 am

(Aug 25, 2012 11:07 AM)BlackArray Wrote: [\[CITE\]](#) I am not selling bins. Source-code only. Proof can be given, but only if the user has money - i am not going to waste my time.

I know i cannot say directly but i think said user was trying to say if we bought the source HOW Could we make are money back.

?Sakura? - August 25, 2012, 11:38 am

Hello,

Vouch for both my negros, first Mother fucken BlackArray(we can call him black Ass). Next for the Coder. I used this before and it's amazing and sold for a while. I both know them, but one likes \*caught cock \*caught

Anyways good luck :)

I ? you both :D

L?ve,  
Me:)

Nikolas - August 25, 2012, 11:44 am

Vouch for this! It's an amazing bot <3

DeMoNi - August 25, 2012, 11:56 am

@English he doesn't want to sell bins anymore, i don't know why, he asked me to sell source. IPKiller has a great reputation, and is a lot much expensive.

**Smokie** - August 25, 2012, 12:03 pm

(Aug 25, 2012 11:56 AM)DeMoNi Wrote: [\[CITE\]](#) IPKiller has a great reputation, and is a lot much expensive.

I 100% guarantee this bot will be better than IPKiller.

**?Sakura?** - August 25, 2012, 12:05 pm

(Aug 25, 2012 11:56 AM)DeMoNi Wrote: [\[CITE\]](#) IPKiller has a great reputation, and is a lot much expensive.

Hello,

1. IPkiller is popular on HF Only and is for people who are new to botnets
2. It doesn't have x86 and x64 bit Rootkit (And only some malware (MAJOR LEVEL) Have it)
3. IPKiller has nothing special(I own it)

L?ve,  
Me:)

**?Mystical** - August 25, 2012, 12:05 pm

(Aug 25, 2012 12:03 PM)Smokie Wrote: [\[CITE\]](#) I 100% guarantee this bot will be better than IPKiller. If i can ask how can you guarantee this? Ipkiller has a database because it was proven to work, was proven to be stable and was cheap. Now who is to say this isnt like autumn bot with the price tag and isnt complete shit?

**Smokie** - August 25, 2012, 12:07 pm

I don't fuck with his features, i'am explain why don't compare Two different program by her price Now u understand ?

**?D?vi??c?t?™** - August 25, 2012, 12:37 pm

BlackArray is a great coder and actually knows what he does instead of the other 95% over here..

This also seems to be even better in some way then the 'well-known' andromeda 'best-http bot atm'

- "" aren't my words tough :)

**Coiner** - August 25, 2012, 1:15 pm

So much rage in this thread.

You say IPKiller is better than this because of its reputation? For god sake, shut the fuck up. IPKiller is nothing to this, its like comparing zeus to carberp.

@Devian it doesn't matter if i can code or not, i did not code this so its irrelevant.

**SBMK** - August 25, 2012, 1:17 pm

(Aug 25, 2012 10:42 AM)BlackArray Wrote: [\[CITE\]](#) IPKiller was sold for 2000\$ (source-code)

Read the feature list, sir.

@English he doesn't want to sell bins anymore, i don't know why, he asked me to sell source. Lol "Better coded" i know the coder of this bot and he didnt made any sale on opensc (followed until osc went down) the coder is the same one as 504 Error bot(helped stanislav coding it),

You know everything what you mentioned on your thread is included in ipkiller except the rootkit?

So what makes your project 3.5k? it doesnt have any reputation here, dont tellme the rootkit is making the price so high.

I lollod very hard about this :

This shows 85% of the bot is c+p'ed, Also whats left are the DDoS methods which can be coded within a hour(from scratch).

Just saying man you russian guys are too overpriced, if you ask big cash for good products like "Blackhole" etc, ok... But if you ask 500\$/Bin for a project which can be coded within 2 days/ max 1 week.... Or shit like Pandora(Using synapse for their communication/DDoS) thats not normal man.

**Mr. Fink** - August 25, 2012, 1:17 pm

features don't really mean anything, as far as anyone who sees a thread. Half of them may not even work properly like Blackshades. Maybe you should somehow post evidence of them actually working instead of getting your friends to post and give you their 100% guarantee for a product we've never seen in our lives.

**DeMoNi** - August 25, 2012, 1:18 pm

Oh god please, your using RC4 for encrypting the bot settings.

Cmon man, if somebody like me finds a bin he can crack your product within 10 minutes.

Another example , Using TStrList (+1,2 kb on your bin)

Hard eh? Using a Array of String.

Says enuf. Everybody can get friends to vouch, make a video demonstrating the attacks, rootkit and other functions and people will believe this. Also decrease the price because nobody will pay 3.5k for a unknown bot.

**Coiner** - August 25, 2012, 1:54 pm

(Aug 25, 2012 01:49 PM)MPhck Wrote: [\[CITE\]](#)

<https://i.imgur.com/9tN0m.png>

I didn't ask anyone to vouch. Also drop prices? We can show the bot fully in action through teamviewer, if the person has money. No videos, its a time waste. So what, i should decrease price coz not popular? Are you stupid? I dont sell popularity, i sell product.

RC4 is not used to encrypt settings, where u get this shit from noob? Its used to encrypt rootkit with dynamic key.

*\_Stoner - August 25, 2012, 1:56 pm*

or you should prove that the bot is not actually C+P... I don't know you so i really don't know what to think.. good luck with sales.

Coiner - August 25, 2012, 2:11 pm

Now while IPKiller has some good features, I think this offers a lot more

1) Rootkit for both x86 and x64. I had to code own hook library in delphi for this. Used the BEA LDE for both x86 and x64.

Used XE2 for 64 bit dll and 64 bit dll launcher.

2) Botkiller, Persistence, DDOS(only use winsocks, no wininet, or Indy Components)

3) Several other ideas which make the bot a little bit more stable. For instance, it doesnt run any of the ddos commands in its own instance. if the ddos module dies, it just spawns a new copy to carry on the work. and Original instance just handles requests to panel. [ So even if buggy code (for example) caused a module to die, bot will be connected to panel regardless]

To Mphck:

why do you think coder showed that information? To show that he wasn't Copy pasting and instead credited the original authors for the good ideas.

Aphex is still credited, even though his library is no longer used. Coder had to make his own for his x64 rootkit, therefore removed aphex's hook library for x86 and used his own.

If it was 85% copy paste, the coder definitely would not show the credits screen would he ?

Nothing against IP Killer, but why the beef?

(Aug 25, 2012 02:10 PM)Fallout 3 Wrote: [\[CITE\]](#) or you should prove that the bot is not actually C+P... I don't know you so i really don't know what to think.. good luck with sales.

How many times do i have to repeat.. Have cash? Contact me, will show proof through TeamViewer.

**SBMK** - August 25, 2012, 2:17 pm

(Aug 25, 2012 02:07 PM)I ? You Wrote: [\[CITE\]](#) Thhat alpha flare was by scammer nexxion who told me he's op at coding php

Didn't Mphck tried to sell ipkiller because he was scared that it was cracked and thought it was leaked???

Anyways stop hating, you were hating on stoners thread a while ago please gtfoNah sold it because i dont got time supporting/updating it anymore and got a much better business. And nobody cracked version 1.8-2.0 yet, even when i spreaded the download link everywhere.

(Aug 25, 2012 02:11 PM)BlackArray Wrote: [\[CITE\]](#) Now while IPKiller has some good features, I think this offers a lot more

1) Rootkit for both x86 and x64. I had to code own hook library in delphi for this. Used the BEA LDE for both x86 and x64.

Used XE2 for 64 bit dll and 64 bit dll launcher.

2) Botkiller, Persistence, DDOS(only use winsocks, no wininet, or Indy Components)IPK 2.0 got Persistence also and DDoS using WinSock without any components.

So whats left = the Rootkit for x86 and x64 , and the botkiller:P

**????Chicago Bulls** - August 25, 2012, 2:18 pm

LOOLLOLO YOUR LAZY TO MAKE 3500\$ LOL  
made me lol for 5 minutes.

show a video. and if your lazy.  
go get a job at a farm or something.

Username: MPhck [log out]

IPK 2.0 got Persistence also and DDoS using WinSock without any components.

So whats left = the Rootkit for x86 and x64 , and the botkiller:P

If the rootkit is ring0, it is well worth the source code for that alone

go get a job at a farm or something. Jobs on farms are not for lazy people. Sick of people saying that shit.

It's much harder to prove it isn't C+P than it is to prove that it is C+P. Think about it ho would you go about that!

MPHCK just GTFO so that people can be more productive than yourself...

Uhm bro, i was meaning towards if hes lazy go get a job at a farm so he wont be lazy.

**Coiner** - August 25, 2012, 2:46 pm

If anyone is serious about submitting a bid, we will first show you that it actually works, and show you parts of the source code to verify it! then you make the purchase. We aren't going to hide anything

Please stop saying this is a copy paste project.

wherever ideas are improved on, or sources used, they ARE credited in the source and even in sales thread in OSC

**Nassim** - August 25, 2012, 4:04 pm

Another question can u explain me this

(Aug 25, 2012 09:52 AM)BlackArray Wrote: [\[CITE\]](#) I will keep this short - I don't give a shit that i don't have a pretty thread like all products here and so on, but my friend asked me to sell his source since he urgently needs money. Have you got the source code ?, if yes how can a Coder send u a source that cost 3k\$, just imagine if you will not sell it ? You can resell it for him but by adding here contact informations and ...

BTW Good luck W sale

**Coiner** - August 25, 2012, 5:07 pm

I don't get what u want to know. He sent me source to get it sold, what is the problem?

**????Chicago Bulls** - August 25, 2012, 5:15 pm

Lol, i wouldnt care if u were my brother, if i had a source worth 3.5k.

i would NOT give it away free for someone to 'resale'.

this seems fishy.

**d0to** - August 25, 2012, 11:26 pm

I've spent many hours talking to the author of this bot, and I can tell you, he is very experienced.

This bot was recently on sale for \$550 dollars, per bin, on Russian board(s) (contact me if you want a link). Poseidon is also incredibly powerful, up there with the DirtJumper family. If you are looking to make a lot of money by reselling bins, this source is perfect for you. You have my vouch, OP, good luck with sales.

Edit: I also want to note, the project comes with the PHP panel, that does not have SQL vulnerabilities as Pandora/DirtJumper panels.

**SIM-1033745** - August 26, 2012, 12:18 am

Vouch, looks like a really awesome bot!-----

**Falconw0w** - August 26, 2012, 12:54 am

Product looks cool and powerful. Hope you get buyers. GLWS.

**anonymous1506** - August 26, 2012, 1:17 am

Seems very nice. Good luck with sales

**TeemoProd** - August 26, 2012, 1:57 am

I vouch for this product.

Owner knows his shit.

So you've bought the source?  
Also which russian board?

**Okey...** - August 26, 2012, 5:29 am

Vouch :D

Very good product, and nice friend ! <3

**d0to** - August 26, 2012, 5:53 am

No, I didn't buy it. Screenshot is from the coder; I asked him some questions. One of them was Xaknet.

**Fjertake** - August 26, 2012, 7:57 am

Looks Awesome vote for this guy probelby best botkiller you can finde here

**Coiner** - August 26, 2012, 8:43 am

Still for sale! Once sold, i will close the thread and as you clearly see - its still open. WILL BE SOLD ONLY ONCE SO HURRY UP.

**Scaliber** - August 26, 2012, 12:54 pm

vouch for op knows his shit, got my vouch!

-xenonlegend

**jmoriarty** - August 26, 2012, 1:10 pm

This bot is a beast , with best Stealth and DDos mechanisms currently sold on public market , IPKiller and such products can't be compared to it , what a stupid cunts flaming?

Vouch. I am customer of this bot and beta-tester.

**BlackArrayIsGay** - August 30, 2012, 11:42 am

Currently best Malware sold on HackForums.

**3oxic** - August 30, 2012, 2:00 pm

looks like umbra loader..

Very close each other!

Before you post something , READ threads.

I don't get what you want to say by your POST , What does optima have with Poseidon? What a fucking FAIL?

Also , where is Optima's source leaked? And zemra is C# bot , not Delphi.

Are you smoking some weed or ??

**Flowz** - August 31, 2012, 11:26 am

The best part of this all, THAT GUY IS NOT ME!

?

PS: The so called russian friend of yours, is stanislav, he's a known moron around here.

**BlackArrayIsGay** - August 31, 2012, 11:31 am

Stanislav is a good guy , and is not a moron. He just likes to troll much much.

Also he likes to manipulate people and make them work for him , lololo i remember hostbooter incident ?

after snypz make him mad , stanislav used people to crack it ??

But he's very good friend !

P.s i am not seller, lol. Seller is blackarray , i just know him. haha.

**ebalvrot** - September 5, 2012, 12:36 pm

Vouch for this, seen this in action lololol
