Thread: [\[Source\] Flood Class \(UDP/SSYN/HTTP\)](#)

Banks? - August 25, 2012, 5:35 pm

I'm not a fan of the whole "PM ME SO I CN FEEL SPESHUL, DEN I GIVE YEW SAUCE." thing, so here it is. No introduction, no bullshit, just code.

<http://pastebin.com/mM01jqa8>

Usage:

[img]http://localhostr.com/files/6ThDCcs/capture.png[/img]

I could have done a few things better, but I don't care enough. It's good enough for free code I think.

Also, I didn't test most of it, so if it doesn't work, fix it yourself; but it should work.

Percocet - August 25, 2012, 8:00 pm

This probably uses your own connection, but thanks for the post.

Haha what do you expect it to use? Lmao.

@OP - Nice work, didn't test it but it looks like some decent code for being free. Thanks!

Khaos Theory - August 25, 2012, 10:55 pm

Pretty decent good and thanks for the no post and pm bullshit. Also I wonder how many new flooders will pop up now.

LOOI

You are hilarious dude, every ddoser uses such a code to ddos from ITSELF, do you think the bots ddos from someone elses computer?

jessman420 - September 11, 2012, 5:41 am

Thanks for sharing this, this is a handy addition, to a project I am working on.

Banks? - September 11, 2012, 5:43 am

Honestly the class is pretty buggy. I would recommend changing a bunch of things if you're actually going to put this into use.

Envy8 - April 10, 2013, 2:02 pm

CTRL + F, IsFlooding, replace the line with :

Code Public IsFlooding As Boolean

Don't mean to necropost to be bothersome, however this is a handy code, so I figured for anyone searching for this, change this.
