and also.

And today 1 guy called Dragond bought our crypter.

first of all his reputation is -10 and 2nd thing he is big n00b.

he is saying the crypter is not working but we showed him in teamviewer that is working but he asking for refund now i know he will keep stub and will ask for refund now and he will start posting bad things on thread so i guyz i am requesting you that dont take that guy seriously.

no... and i dont even know about that crypter.

i just googled now and see it has similar gui .

but every multi crypter have to make gui like that so you can crypt multiply files.

?

eCoLoGy - September 9, 2012, 3:52 pm

Nop, if it's not from insidious it was from another crypter I bought some time ago.

The GUI is exactly the same. The menus with the mouse right button are all equal!

But anyway what matters is the code :)

we have different option than that crypter if someone made that gui before it does not mean that no one can make gui like that.

?

eCoLoGy - September 9, 2012, 4:21 pm

Sure but is 99,9% impossible for a different person to make a crypter GUI exactly the same with same menus and all so I'm just saying this GUI is not your work.

Is the crypted file runtime FUD again?

If so, send the stub to me please.

donthme - September 21, 2012, 2:55 am

I really hate to post on sales thread, when I say it, I really meant it. I hope that you would contact me soon as possible and solve the issue.

The crypter doesnt work with my botnet. Before buying, I did ask if it works and Don told me it should. It corrupts the bnet plus when using injecting function it extracts the exe file to the desktop and then it runs the extracted file, which is really lame because it defeats the purpose of using a crypter and the Startup function is not working either, it gives an error on startup. I havent heard from Don for the past 24 hours and it has been over 3 days and still it is not working.

So I tested it out with another app to see if the startup function works or not, and it did not. Even with other harmless app, on windows restart, it just gives an error and it did not start.

I either expect a working solution or a refund.

Edit: It has been over 4 days now, still no reply.

Edit2: Yes, it does looks exactly same like core crypt. Stubs are same and every function is same. Even the thread copy and paste it same.

man i want to update my HWID. reply me on skype. i need a quick response man.. i pm you with my hwid details.

sniper07 - September 30, 2012, 2:08 am

Donrulezz, your PM been disabled. Please provide me with my stub updates

Process - September 30, 2012, 11:25 am

GLWS, this looks very clean and sexy. Might refer my friend to this :D

Oran+ - September 30, 2012, 11:26 am

Hello Support

for what time The stub are fud usualy ??

Vitrex - October 2, 2012, 2:37 am

Sorry had connection problems the last week because i got a new internet connection check your pm for crypter :)

maches - October 2, 2012, 2:46 am

Hey,how long the crypted file staying food?

The Equalizer - October 3, 2012, 6:18 am

Finally I have crypter which has many function who is easy to use,with nice and clean GUI,but I still waiting coder to provide me FUD stub since stubs he send me are 3/35.

I hope I will have stub soon as possible,and start to use my crypter.

sniper07 - October 3, 2012, 9:23 am

I been waiting for a week for a FUD stub. There is no support and they dont answer PM requests.

Trolly Trollerson - October 4, 2012, 1:03 am

This crypter used to be good but now it is absolutely garbage. it hasnt been FUD most of the month at all.

the owner never responds (havent received a message back in weeks , even when he is active and online)

i dont know what went wrong with this guy or crypter but i hope they get back on track. wasted my \$ for a month because i havent received a new stub or support or even a responce in weeks....truly sad ?

The Equalizer - October 4, 2012, 5:59 am

I still expect coder to send me FUD stub which he said he will do it 2 days ago.Donrulez since you're

unbanned now I hope you will do your best as reseller to resolve this situation.
If coder can not fulfill his commitments, then simply he must refund me.

Edit 1:

It has been past more than 15 days, and I still can not use crypter which I have paid due to coders irresponsibility. Reseller has not even try to answer me here or at skype on my questions I ask him so he is unprofessional also like coder for which he works.

I want instant refund from coder, and I do not recommend anyone to buy this crypter.

Vitrex - October 9, 2012, 2:34 pm

I have already contact you to refund me, and I will wait till you get some money.

Beside will you enclose yourself from claims of your body limited aka GoaFreak which claims that you and him are here only to scam HF members?

Donrulezz - October 10, 2012, 5:07 am

just finished. take a look :D

Does it stay fud for more than 1 month? Just wondering...

stealor cryptador - November 30, 2012, 8:36 am

dragilie: get server fud for one month is almost impossible because skids scan output anywhere and there are some webs send sample to AV companies like : virustotal, jotti;metascan...etc and the server will be detected

I know that but i saw this:
