Hi everyone I'm going to show you how to upload a video to youtube from making the video to saving it so youtube can actually support it, so what you need is a good filming software and a good editing software

[Windows movie maker](#)

[Hypercam](#)

[Camtasia studios \(SUGGESTED\)](#)

Camtasia studios IMO is the best, it films and edits.

So once you have download one of the above let's say camtasia you need to open it and select "record screen"

Spoiler [\(Click to View\)](#) [IMG][http://i46.\[censored\].com/fa3fd2.jpg](http://i46.[censored].com/fa3fd2.jpg)[/IMG]

Now once you have done that this window will pop up and you need to choose what part of the screen you want to record E.G -

So you have chosen the part of the screen you want to record and then hit "rec"

Now you will be recording and it will count down before starting, to stop the recording hit "F10"

So now when you are done hit F10 and it will preview the clip, there is a button called "Edit" hit that and then save your clip and it will open camtasia editing and give you some options choose this one

And then you need to add music by pressing "Import media" then finding your music file and dragging it onto the timeline. When you have done that you need to save your work. Now, go to file, produce video as.

Now a window will pop up, choose YouTube and then hit next.
Now name it whatever you want and hit next

Then it will render

Then go to

www.youtube.com

and sign in, then click your name and select "my videos" then in the top left it will say "new" click that and select video.
