Thread: [\[REQ\]\[LOGO\] Need logo for new site.\[Payment\\$\\$\\$\\$\]](#)

Nullschritt - August 29, 2012, 3:35 pm

Hello, I am starting a new software business and I have decided to name it MadHatter Technology Solutions.

The primary goal will be to keep up to date the software we are working on(bleeding edge cryptography software for chatting, and file encryption, etc). We have a few products we are getting close to being ready to release, and are looking for a logo to use on our website.

Basically I would like it to say in big letters
"MadHatter Tech Solutions" or "MadHatter Technology Solutions"
With a tagline of
"Impossible is a matter of perspective."

I was planning to make the website dark themed (grey or black) with lots of colors and imagined the logo would have like colored ribbons around it or something of the sort(like in the templates below in argon and design blog). And I would like to see this image or something much similar beside the text. Edit:

<http://www.iconarchive.com/show/batman-rogues-icons-by-greg-barnes/MadHatter-icon.html> [oops left this out]

Anyone who gives this a decent shot will get free access to all the software I publish (even if I don't pick yours) [I hope this would be enough to repay for your work]

I appreciate all efforts!

(We were thinking of maybe using one of the templates below)

PS: I might consider making a donation to the person who's work I pick, I should have some extra funds soon, and if I'm really impressed, I might even continue to pay for your services in the future. (basically I'm saying if you impress me, I'll pay you ?)
