Thread: [Webbased shell booter or .exe shell booter?](#)

HTTP404ERROR - August 30, 2012, 12:05 am

So..

I've got 5K WebDAV shells and about 5 VPS shells.

Should I make a booter to sell? Or are there already too many booter out there?

Webbased or .exe?

OMARATION - August 30, 2012, 8:00 am

WebBased is better in my opinion. .exe's just suck balls.

and if you're making webbased, don't use any source code. Use Paid ones or custom ones ;)

Define pure - January 16, 2013, 6:16 pm

I would think web based are easier and more trustworthy even though i have no idea about any of this stuff i'm just now trying to find a booter.... sorry..

Zero™ - January 16, 2013, 6:22 pm

Go for webbased Booter bro as its more stable and send's command's to shell's quicker Good Luck!

Stratz - January 22, 2013, 12:53 pm

It's best to go with the Shell booter rather than the .exe booter.

amus3d - January 22, 2013, 1:04 pm

Web-based will always be better.

You can access it via the web (on any system, assuming it as Internet access), it is also more easily managed.

RedditMan - January 22, 2013, 1:27 pm

Webbased in my opinion. I heard .exe booters use your connection to boot. (:

Ewbuntu - January 22, 2013, 1:31 pm

Orbiting - January 27, 2013, 1:49 am

looks nice, gl on that. web based are better

mikey1998 - January 27, 2013, 4:44 am

niceee man cant wait to see what you come up with goodluckk

Doxicity - January 27, 2013, 5:26 am

Web based is always great. As amus3d said, they can be accessed from devices such as a phone, ipod, or any device with internet capabilities. Good luck with your booter.

Web based will always hit harder if your using a VPS or API. If you wan a custom source PM me and I can code one for you for \$3/per 30mins (as in my signature)

Best Regards
