I don't know if this have been posted in here, so i try make one.

To lazy's i have a good video that took me 10 minutes to do it HD.
[Video: <http://www.youtube.com/watch?v=UMJjjmjkM8Q>]

Okay, now i gonna show with pictures.

Go to www.myiptest.com . In there? Now click on Get Someones IP.

Look like this i think so.

Okay, clicked on get someones IP?, Then you're right.

Now copy the "Link for person" link.

Send it to your Victim.

Now you it's like you got the IP !.

Now copy the "Link For You" Link. And then brows it, he's IP should be in there.

I don't care if you DoS me, I have Dynamic IP.

Hope all you guys enjoy the TuTorial!

Took me 30 minutes to make this TuT.

Please lose 20 seconds and say thanks on this thread.
