Thread: [\[UBER&L33T DISCOUNT\] \\$1.00 phone# info \[UBER&L33T DISCOUNT\]](#)

Systematic - August 31, 2012, 1:47 pm

Hello, I've recently coded myself an executable containing a complicated algorithm which allows my to find some basic info about a phone number.

This service is going to be very cheep:

1 phone# - \$1.00 USD USD

2 phone#s - \$1.50 USD(Normal user) \$1.00 USD(Upgraded user)

The phone# will not be stored at all and nothing will be sent to the phone. here is the info you will receive: Phone type (cellphone or land line)

Phone Company

City the phone is located in

I accept PayPal and PayPal only. Please PM me if you are interested.

Vouch(es):

EDIT Forgot to mention this works only for phones in the US and Canada!

OldFag - August 31, 2012, 1:48 pm

Can I have a vouch of this? ?

I am not selling an application. I am just using the one I made. If you really want a screen shot I can post some for you? They're kinda boring tho...

UPDATE I added a discount for Uber&L33t.

im pretty sure that theres a site that receives all this info, but thanks

SeventhS - September 1, 2012, 10:31 am

This can be done for free on many websites

Can they guarantee your privacy and that they don't store the phone number?

Nameless™ - September 3, 2012, 10:52 am

Not to sales trash, phoneaddressdirectory.com is free... and who cares if they store someone else's
number?
