I heard it was backdoored, so ever since then I haven't trusted it. But why buy a RAT? There are so many good free ones haha.

from my understanding of what i know , <http://www.bshades.eu/> is the official site and the program is not backdoored. but i like to stick with free shit xD (Darkcomet all the way)

In my opinion, Blackshades sucks, test other free rats,

You can check this thread: <https://hackforums.net/showthread.php?tid=2734666>

Anyway you can test cracked versions of rats, like xtreme rat or cybergate..

lord_nathan9 - September 2, 2012, 10:00 am

It is definitely not worth it if it has a backdoor. People have lost a huge amount of bots. Blackshades probably has hundreds of thousands unless they sold the bots. Then they probably have as much as 5k-10k.

But from what I heard any program can be modified with a backdoor even legit ones. Only way to be sure is to be good at disassembling programs.

Honestly, I would stick to DarkComet. Even though there's a few more perks to Black Shades, it's not worth paying the money for. It's still more stable then any other RAT. Whatever you do, don't purchase Paradox. I bought it, and it's dead the next day. I didn't get my money back, either.

Wait

Isn't the official blackshades backdoored? Or were they talking about cracked ones?

i beleive all non-official Blackshades are backdoored, because who would release such a good product knowing they were going to get a hella amount of downloads without it. :P

.?cb. - September 2, 2012, 10:03 am

Official blackshades is backdoored.

Cracked version of it, is more clean, because staff of blackshades can't run shit in your bots.

Okey... - September 2, 2012, 10:05 am

If you are going to use blackshades, use the leaked logon server with the 5.0 client

Nothing new between the 5.0 and 5.2, they just added a new auth to the logon server.

Eraldo Coil - September 2, 2012, 10:13 am

I heard Blackshades runs a bitcoin miner on your slaves.

The owner of DC stopped the project after the owner of BS got V&. I'm guessing there's a connection with that?

TRiGGuH - *September 4, 2012, 9:03 am*

ya bro not worth buying, darkcomet works like a charm !

Laxzor - *September 4, 2012, 10:49 am*

If DC sees all this hype, they would be really happy and they deserve the applause people atlast loving DC and comparing it with a paid rat :)

atleast DC should now release a premium version with more features :P

Mr Kewl - *September 4, 2012, 11:00 am*

Best paid rat sold on Hackforums.*

Do you even know about other rats?
