-mothered- - February 22, 2010, 3:07 am

Very nice collection Indeed. I won't have the need for the lot, but many of which, will definitely come
In handy.

Thanks for sharing mate. Good work :)

diablo0606 - February 22, 2010, 3:18 am

Nice list

downloading now

thx

mueny - February 22, 2010, 7:51 pm

a compilation of a bunch of free av's?
that's cool

zer0day - February 23, 2010, 4:26 am

Thanks, definately useful.

no its just binding of all programs

rbrow - March 3, 2010, 9:43 am

In my personal experience, the ultimate repair tool is having a second working non-infected PC available. You can just pull out the hard drive from the infected PC or notebook and fix it using the non-infected PC. Just make sure autorun is off on the non-infected PC first. Works for me every time. ?
