Are you sure these are not infected (binded with anyone else' server) ?, If you're not sure they are or they're not.

Please mention that in your thread that you do not take responsibility,

Because right now you do take responsibility.

Skiezo™ - December 12, 2012, 10:37 am

Make sure none of the RATs are not binded with viruses,

Because some of the RATs might be infected with Malware file that has been made by Users.

(RATS or Keyloggers)

Otherwise good job.

This thread is 12 years old man, last time OP was online was 3 years ago, take care to this so you don't dig up old threads.
