Thread: [Scammed by Trinidad || uid=1425924 || TNT booter](#)

?ire - September 3, 2012, 1:10 pm

Well I sold the user a booter source which he tells me isn't working but seemingly it works fine on my cpanel hosting(He is using SPAM) but he then proceeds to mess with the coding and as soon as I send him the sql database he revokes my L33T onto his account. Here's the whole skype chat which can be viewed on teamviewer if anyone wants <http://pastebin.com/6MSKLbDL> . He claims that the source isn't working even though it's working fine for control booter and it's the exact same source we're just moving to a new custom coded one. I will also personally have in PHP coder look over this source to tell this idiot it works.

==

User profile link : [Trinidad](#)

Amount scammed : \$18.99 (L33T) +\$20

Other scam reports : None

Proof :

Spoiler ([Click to View](#))

<http://pastebin.com/6MSKLbDL>

==

I haven't provided much proof because of the fact it's from Omni, the owner and I think that's enough. If anyone needs anything proven to them just pm me and I'll teamview you and show you everything.

Interesting, definitely looks as if this kid has made a bullshit scam report but made it look legit because it happened to him

Miki - September 3, 2012, 1:20 pm

Looks like a detail scam report, next thing you should do is go here and report him, www.hfswag.com.

(Sep 3, 2012 01:16 PM)HSBC Wrote: [\[CITE\]](#) Pastebin files can be easily edited, you called him a scamming friend before you even dealt with him, you're posting private messages between you and admins which i'm sure isn't allowed, you refused to help him when the source didn't work and told him he was an idiot when he fixed it himself, you obviously threw errors in there on purpose, and now you are hitting people offline.

You are a moron. Leave this site.

Like I said anyone can come on my teamviewer and check what I said. I'm posting private messages because it's my proof and everyone does it. I never refused I either didn't have time or he wasn't going to pay me. He also tried to pull a trick on my by telling me our middleman scammed him then when I wasn't buying it magically he got his money back inside a few minutes . I never put any errors in there or edited the code in any way you can also see that by coming on teamviwer and I was going to show him my booter working and hitting of a target and then he blocked me on skype.

Maybe I just read it fast but it seems like the same scenario.No it's nothing like the scenario with Asda, he refuses to talk to me or reply with any form of contact and therefore I won't close this, he told me he had things coded in which he never and then left it not fully working. It's a compeltly different source and nothing to do with that other scam report which I would happily resolve by him doing a few simple task to make it work which would take around 10 minutes.

(Sep 3, 2012 01:20 PM)HSBC Wrote: [\[CITE\]](#) Interesting, definitely looks as if this kid has made a bullshit scam report but made it look legit because it happened to him

Like I said in my previous comment, I got the full source from Asda but it wasn't complete and can you not see the proof and the fact that he took my L33T away ? It's also not even the same source.

Mediodude - September 3, 2012, 1:38 pm

Your pastebin url is not working. Could you maybe update it please?

?ire - September 3, 2012, 1:41 pm

Judging by what ? I have one scam report which I want to resolve but he won't do what he said.

Crysis. - September 3, 2012, 3:08 pm

So let me get this right;

You scammed ASDA of this source then you tried to sell it on to someone?

That in itself is a bit sketchy is it not?

Where did you get this from ? ASDA coded me a complete different source than this one then wouldn't fully finish it. This isn't the same source as ASDA coded me.

Don't you think this is a bit sketchy though? I doubt you even got scammed, you're probably selling the source he coded you.

100%.

100%.

Really, ask trinidad the colour of his source then I'll prove you wrong. Can you not see I got scammed and what if I'm selling the source he coded me it's mine which I paid \$200 for.

So you're saying ASDA half-coded this source and you tried to sell it when it isn't complete? It's just wrong.

?ire - September 4, 2012, 8:00 am

(Sep 4, 2012 05:59 AM)HSBC Wrote: [\[CITE\]](#) So you're saying ASDA half-coded this source and you tried to sell it when it isn't complete? It's just wrong.

No, I'm pretty sure you cannot read properly. This isn't the same source as ASDA MADE!

?ire - September 12, 2012, 3:15 am

They are now using my booter source in there booter.

You mean the booter source that you paid someone else to make? It's not even yours, are you like 11? just shut up

Tor - *September 12, 2012, 4:50 am*

Looks like alegit scam report mate .
I am sorry for the money

cyberdog - *September 14, 2012, 10:21 pm*

Hey so if u want revenge then why not just post the whole booter source for free maybe :P

Control Panel - *September 15, 2012, 10:10 am*

100%.

its not the same source it 2 completely different thing from what i have read and if i an not mistake if he is using the source with out permission that copyright am i mistaken?

Trinidad - *January 17, 2013, 6:57 am*

How can I get this scam report rep off my rep page? This is a joke.

What even is this scam report. It was proven fake, pathetic this scammer got caught out and tried to make me the scammer, aha.
