Lol? For the reason that you have TTG in your name, i'm not going to join, and also this "clan" isn't a "clan", one of your options are Can you have YT accounts. Basically you have learned the noob basics of 'hacking' if you can even call this crap hacking and you want people to basically hack YT accounts for you because you can't. Read you like a book.

killer55755 - September 4, 2012, 4:09 am

All this is is some desperate 12 year old kid whos found hackforums and tried to get a group of hackers to do his work for him and call it a group so he gets an unfair advantage and doesn't have to do anything.

Appearently :D

And how does this in any way relate to hacking tutorials?

Apart from the fact that RAT'ing is quite beginner-ish, why on earth would you use free and discontinued software?

Hinshi - September 8, 2012, 3:14 pm

USER IS CROSS-POSTING.

I have already replied to his OTHER thread on how he needs his "clan" to be more advanced on his "1337 Hax0rz zki11z".

Everyone should STOP replying to this thread because it keeps this thread new.

The kid is OBVIOUSLY a dumb bitch because

- 1: His tage is "TTG_NOBALLS" (MUST I say more)
- 2: Over-use of emoticons.
- 3: NO coding req AT all. This "clan" is a WASTE and he uses HF to trying get "dEm HXZ".
- 4: Dreadful grammar
- 5: "Do u have skype?///must have skype!!!"

???

SIM-639097 - September 8, 2012, 3:19 pm

I especially like the "Can you hack into youtube accounts?"-part.

Anyone in their right mind would get suspicious of someone even asking a question in such a way...

This person has no idea of programming. Probably one of those people expecting hacking to be just the click of a button and... DONE!
