Thread: [\[Fully Undetectable\]VB.net method for storing / writing resources \[Bypass Avira\]](#)

Ironside - September 6, 2012, 7:23 am

This method will bypass Avira and is Fully Undetectable.

Example:

Your stub is FUD, but after crypting/building the file, it becomes detected by Avira. This is your solution! Using this method, it won't be detected anymore!

The method costs 14.99\$. There are no vouch copies and the price is not negotiable!

Proof:

A small string added to resources:

Spoiler [\(Click to View\)](#)

why this is not on the sellers section?

Ironside - September 6, 2012, 9:08 am

The thread is located in the right location.

Ironside - September 8, 2012, 8:59 am

Still selling this method.

Get it while it's hot.

Dionysos™ - September 9, 2012, 7:42 am

Vouch, bought this method. It's completely FUD !
