Sup everyone? I just now hit 1,000th post. Please excuse me on how I suck at reviewing things xD, Anyways.

I joined Hackforums as a big ass skid. I was looking for a "Booter" To kick people offline from imvu.com, Then I just stopped looking for one , and I stayed on Hackforums. I mainly learned about RATING and a little bit about defacing websites but I no longer rat. I will RAT someone on imvu if i feel like it to gain a little. I made a lot of good HQ friend

s here. I hate how You have to pay to get respect. I'm already used to getting trolled/flamed. I do believe I am a active user. The first site I go to when I turn on my browser is HF. You may say I am a no lifer x) But I am addicted to HF. Now I love how HF is maintained so well. It isn't like no rules do what ever the fuck you want. Staff does a great job here. I Don't know that many staff but my favorite staff member would have to be [bugga](#)

Every other staff member are good but I only talked to Bugga.

Basically all adds up I rate hackforums 8/10 from every other forums i visited.?

People who I would love to thank who helped me out:Khosti (spelled name wrong i think)

You can actually learn coding from HF. (Malware at least.) If you keep visiting coding tab, I still recommend you to clear your basics then start with Malware coding.

I got 20% from bugga, doesn't mean she isn't a decent person? in fact she was more than fair with it and handled it well when I PMed her. ???

Anyway, nice feedback I guess.
