Thread: [maximum picture size](#)

William Murderface - September 6, 2012, 1:55 pm

I only suggest this because of how annoying it is to open up a spoiler for a picture and the browser just blows up because the picture is so large

CRT - September 6, 2012, 2:00 pm

That's why people use spoilers because of large images...if you don't want to suffer from your browser exploding due to a large image then don't open it.

It's a good suggestion but you'll possibly something similar to the reply I said above.

Colorado - September 6, 2012, 7:50 pm

I've always seen this as a necessity for forums, but all forum administrators have their opinion. It will never happen, been requested alot. It sucks so many good ideas get denied.

GL1TCH3D - September 6, 2012, 8:12 pm

They can always resize it using the built-in mybb resize code or just hide it with spoilers.

EDIT: Just like this

[img=480x270]http://fc02.deviantart.net/fs71/f/2010/039/4/e/3d_graffiti___Nvidia_wallpaper_by_sidewinder002.jpg[/img]

Full size:

Spoiler ([Click to View](#))

_DeNy - September 7, 2012, 9:54 pm

I think I made a userscript that set's a maximum size for images on HF.

I think I'm going to make it from scratch though, just so it's nice and neat.

If you want it, just send me a PM and I'll let you know when I finish it.

Finished it:

<http://userscripts.org/scripts/show/145132>

Revenge - September 8, 2012, 3:57 pm

I guess they're in a spoiler for a reason but they can be resized anyway?

Roger Waters - September 8, 2012, 4:03 pm

I think they can be resized, if you know the HTML code to do so.
