This thread is wrong in so many ways. If you are going at least put time and effort in it.

Batmayne - September 6, 2012, 3:11 pm

This is not a troll... I will admit it is not very professional, but hey, I don't give a fuck. HMU to buy.

We can host chi ld po rn but no ddos?

And what mean we don't allow ddos, so you don't allow booter/http botnet who ddos from your vps?

Thanks to answer me.

PoopParker - October 14, 2012, 5:44 pm

We dont allow DDOS from our server, we allow HTTP botnet, and booters, as long as the attack doesnt come from our shit.
