Thread: [Buying Enjin Banner & Logo](#)

THE RULER - *September 6, 2012, 6:52 pm*

Hi guys, today I'm looking for an Enjin banner and logo.

I would like the color scheme of both of these to be black, green, and a carbon metallic color. The logo should contain or resemble a creeper.

The banner needs to contain the words "DatCraft" and should either contain something minecraft related or mounted on a minecraft styled sword. The dimensions are 800x150. (horizontally)

I will pay based on the quality of the header, I'm expecting the logo as somewhat of an add-on but I will pay for it separately if it's spectacular enough. I'm not sure what the enjin logo dimensions are but you should find them easily enough.

I will be going off for the night so you can either post your finished product here or PM me. Feel free to use a watermark, I know many people tend to rip.

Bump! I am offline for the rest of tonight!
