Thread: [I want to start coding! \(Where to start?\)](#)

MakinMoves - September 7, 2012, 4:56 pm

What's up everyone? I've been pretty in-active for a while, but I've recently had some more time on my hands. I really want to start coding at a beginner level. I'm just not sure where to start language wise. If anyone has any tips post below or PM me. ?

Super Effective - September 7, 2012, 5:24 pm

I recommend you don't take anyone's language recommendation and figure out what you want by yourself. Everyone is going to suggest what they would want, so why not just figure out what you want and go with it?

I hate how everyone needs to be spoonfed these days.

kenjoe1230 - September 7, 2012, 6:18 pm

I agree with super effective its more about what you really want. But if you want to just know something that's easyish I recommend either python or lua as both are extremely easy to learn.

Dr.Cooper - September 7, 2012, 6:32 pm

Visual Basic? :)

I started coding from VISUAL BASIC. VB.NET

Try it out.

Stormageddon - September 7, 2012, 6:38 pm

learn ALL THE LANGUAGES, really though, everything, it'll help you in the long run.

Tenacious - September 7, 2012, 6:56 pm

spend like 5 days, and try to follow some tutorials for like 5 different languages, see what you like, and choose from there.

After you choose, don't jump between languages, stick with it until you're really good at it, or else you'll be a beginner for a long time.

Hepic - September 8, 2012, 8:23 am

Man i can help you learning languages.

If need help,talk to me.

A + - September 9, 2012, 1:44 am

I would start out with Batch and HTML. That gives you the concept of coding. Then look into some other languages.

warwolf - September 27, 2012, 7:10 pm

You are start a coding

must be start of c .

Because c coding is very basic level ,mid level or high level language.

sethwilliam - September 28, 2012, 2:55 pm

im a noob too but ive heard PHP is easy and python

James Kirk - September 28, 2012, 4:53 pm

I love python, started with it, and I still code it often, you should too :).

Not even going to read the rest of the thread because this is the only thing that needs to be there.
