Thread: [????\[UNIQUE\] Comment Thumb UP YOUTUBE! --> Your comment = TOP comment????\[HOT\]??](#)

lazzo - September 8, 2012, 9:32 am

This is a new feature I implemented into my youtube bot, it basically gives thumbs up to specified comments, it is really cool because you can have your comment in TOP comments, on a video that has 100.000.000 views or more!

I am doing a presentation on the

Carly Rae Jepsen - Call Me Maybe:

So I was wondering what you guys think about it?

It can be used to expand your botnet, right?

How much could I sell this feature/service for?

Leave as much feedback as you can :)

You do know that you said that you can have your comment in the top comments on a video that has 10 billion views or more?

O.O

Ok, maybe I got carried a bit :) But 100.000.000 or more views is working pretty fine :)

As you can see the top comment is getting more and more likes :D

It could be your comment :)

Now tell me more what you think about this :)

Its a great function but the purchase should be somewhat automated, waiting a long time for each comment would be annoying.

Can you give me a vouch, or how much does this even cost?

The service is 1\$ per 50 comment thumbs up, I can always show you how it works and if you are planning on buying lots of thumbs ups we can always make a deal or so, the thumbs up are really fast, and it is fully automated.

Updated:

The service has been speeded up, now its even faster you get your comments in like 10 mins in top comments usually, any video.

Why is this service good?

- It is really good for getting views on your channel, you can easily make a lot of "redicts" from videos such as :Gangnam syle", "Call me maybe" or any other video that has that ammount of viewes or more or less ofc.
- If you want to showoff in front of your friends, how your comments are in top comments
- You can always leave a messege for your wife/gf or anybody like that.
- There are a lot of more ways that you can benifit from this, for instance, linking to your profile from a video that has similar content can result in benifits with some subscribers or so.

I am online and will be taking orders, for every buyer I am giving 20 thumbs ups for free, to test the service before he buys it :)

I would be very interested in purchasing \$10-\$20 worth of up votes. PM me if you are still offering this and how long it will take.

Thanks,
