I just felt like sharing, I bought a pair of A40s, a bit expensive, but oh well :P

No pics yet, they're still being shipped.

Bit expensive but worth it. Astro has the best customer support and high quality audio systems. I've had mine for years and never had anything better.

Awesome, I have some new Astro A30s with MixAmp and I'm not sure what I'm going to do with it...

Here a question, what is better; Dr Dre Beats, or Astro's?

A40 or the A50? I just upgraded from A40s to A50s, but they came broken (lots of people having issues with the A50s) so still waiting on replacement. A40s are awesome but my mixamp's optical input broke.

A40s are better currently, since the A50s are having a mic problem..plus, this is \$100 cheaper :D

and to the other guy, Dre Beats are just for brand. \$150 more than necessary..

Could you use the Astros on the PC or no? Also, what is the big difference between the turtle beach and astro? I have the turtle beach x11's

The difference is that ASTROs have higher sound quality..and are \$150 more expensive..

You could always buy my A40s without mixamp (that has an issue which is why I went to the A50s) if you want - I have all the cables/boxes/case, and they work perfectly.

I saw cheap Mixamps on ebay so considered that but no Paypal for years now.

Got my Astros, but due to my Xbox being banned, I'm going to sell them D:

Good choice. The Astros are amazing and I'm going to get those this December (yes Christmas).. :P

Mordec?i - September 14, 2012, 5:56 pm

I hope you know the Astro A50s are coming out soon if they aren't out already.

I chose the A40s over the A50s because they were \$100 cheaper, plus the A50 has mic problems :/

Not much of an upgrade in my opinion.

An upgrade would be some high class headphones like the Audiotechnica M50 or V-Moda Crossfade LP2.

But congrats though.
