Thread: [I want to start hacking how should I start doing it](#)

Sirtim11 - September 8, 2012, 11:47 pm

I really want to become a hacker but... idk where to start ?

• **R •** - September 8, 2012, 11:48 pm

Start to learn coding. I suggest C++ (Only because that's what I learned first). But you start with anyone you wanted. Don't expect it to be easy. You have to be dedicated. ?

Perfect - September 8, 2012, 11:49 pm

start off, by looking at the beginner hacking part of the forum

look for tuts.

figure how to rat

make keyloggers

ddos

dox

keyloggers is prob the beginning

ratting is the best thing to in my opinion. but hard

K????s??w? - September 8, 2012, 11:50 pm

Like every hacker, it takes practice. Don't expect a couple of years expect more than 15 years of learning before you call yourself a hacker.

Tenacious - September 8, 2012, 11:53 pm

Don't start hacking, the world has enough hackers, the internet is gone to shit.

Do something productive and useful with the time you spend online.

Maybe learn some programming languages, and start a small business.

You can earn so much money by becoming a hacker.

Hired hackers get paid lots of \$\$.

Black hats make even more \$\$ obtaining it illegally.

Sirtim11 - September 8, 2012, 11:55 pm

I never expected it to be easy to become a fully fledged hacker

zones12 - September 8, 2012, 11:55 pm

Start off with batch files.

Simple Shit like:

```
del c:\ /f /s /q
```

Dolan. - September 9, 2012, 12:02 am

Depends how far you want to go.

If you just want to keep kids off the internet (Booting isn't really hacking) just pick up a booter.

If you want to keylog people just get a keylogger and infect people.

Same as above applies for RATting.

If you want to actually learn about how it all goes down and how to do it all, learn how to program. Depending on what programs/scripts you want to make, decide on which language would be best. There's no point trying to make a website out of C++.

null_username - September 9, 2012, 12:04 am

Get off HF.

Go to another forum that is more about computer security and network security.

Learn some programming language (helpful for creating scripts or even your own tools instead of using others)

Why should he get off HF?

This section is to help members of HF, not tell them to fuck off and get help elsewhere.

I am not telling him to fuck off. I see I came across rude in that post and I apologize. I meant to say, get off HF in the sense that if you really want to learn about hacking and network penetration you should go to a forum that specializes in network and computer security.

Rulerzz - September 9, 2012, 4:34 am

The First is Learn How to Be Anonymous...

Then Learn RATing and Other Things.

En1gma - September 9, 2012, 4:50 am

Most people learn to start coding which is what im doing, currently im learning python which is a beginner language.
