It happens to me once and a while... It's nothing major though, so I wouldn't worry about it.

I am too. Typical HF. What do you expect?

Yeah I've been getting it as-well, But all you have to do is keep refreshing the page and eventually it'll go back to normal.

MySQL errors is a problem on HF's side, not yours. Everyone needs to stfu about it. I'm tired of seeing these threads every time HF chokes.

Ya i've been getting them after almost every refresh.

Impuhlsive - September 9, 2012, 9:15 am

I also am having this problem, but there isn't much we can do.

It's coming for me on every second click now.

Before it used to come randomly but not it's persistent.

It's a persistent annoyance for everyone right now.
