Theres no specif tumblr hack tool, you need to guess his password or rat/keylog him.

PhobicHD - September 9, 2012, 5:16 pm

You have to run cmd then type union select username password xx only instead of xx you have to put the URL to their profile. It's so easy, I'm surprised more people don't do it!

Damn it tux1 I wanted to troll :) oh well always more noobs where that came from

I... ehh...

Start > All Programs > Accessories > Command Prompt
Or
Start > Run > "CMD"

The guy was lying by the way.

Lol, "Whats cmd?" You've got some work to do before you're ready to get into someones tumblr. Got read some RAT tuts, and start their. Probably your best best. Probably the easiest too, as long as you know the person.

Haha I thought I was bad but I mean come on... wanting to hack tumblr, doesn't know what cmd is...

Lolita - *October 14, 2012, 5:43 am*

I don't know how to hack, but at least I know what cmd is.

JasonDotExe - *October 14, 2012, 5:45 am*

Ummm ok... I don't think cmd is going to help you much unless you want to watch star wars!

Raz Riverblade - *October 14, 2012, 5:47 am*

Keylog

or if you want to mess with him, RAT

asdealmeida16 - *October 18, 2012, 1:25 pm*

Oh god...some people disgust me lol !
