How to get Twitter usernames

1. What do you need?
2. Which usernames are 'jackable'?
3. The method!
4. FAQ

1. What do you need?

There are not a lot of requirements for this trick to work. However I recommed to use a VPN or Proxy if you're 'known' at Twitter.com (Like signed in to multiple accounts using

1 IP) If you ever need any help PM me

2. Which usernames are 'Jackable'?

This is by far the most asked question. How more unique the username how more likely you're able to jack it. If the accounts are famous and still being used your chances are lowered by far. Last names are the most vulnerbale, followed by words from the dictionary and first names too. However you can be lucky or not.

3. The method! (:

First choose a username, as example I'll use "@redeem" (random username I saw at a forum). After you've picked a username we'll go to the following website:

<http://tess2.uspto.gov/bin/gate.exe?f=tess&state=4003:gtbkgh.1.1>

First only check the "Live" box instead of the "Live and dead" box and after that enter the username you desire in the Searchbox and click search.

After you've clicked 'Sumbit Query' a list of trademarks will comeup. Only the ones who say the EXACT name (or 'Inc' is also okay) and click that name. IF YOUR DESIRED

Now you'll be shown all information about this trademark

4. After

If everything is fine your finished and Twitter will email you back in 2-3 weeks confirming your claim. (:

5. FAQ

Q: My desired username cannot be found on the website!?

A: Try one of these websites:

<http://www.ipso.gov.uk/tm/t-find/t-find-text/>

<https://register.boip.int/bmbonline/intro/select.do?language=en>

<http://www.wipo.int/directory/en/urls.jsp>

Q: Twitter didn't accept my trademark enquiry?

A: They do. Just reply that you'll sue them (seriously) and they'll give it.

i hope you enjoyed this guide!

You should add credits to the creator of the guide because this has been leaked.

The step was a .png file on a website but the owner removed the .png file because the guide was leaked.
