Thread: [Hacking Webcam or Website History !!!](#)

yourihackz - September 11, 2012, 6:46 am

Hey guys, ?

I have a really hot gf but i really want to see what she is doing in her room or on her computer, she always deletes her website history, and sometimes i hear a moan from her bedroom when i'am at her if she did go on the shower, is there any way how i can hack her webcam or website history ? or do you have any other suggestions how to do it ?

i really appreciate every little bit help !

Greetingz,
YouriHackz

Sorry for my poor grammar, im from holland ;p

Story sounds fake.

Set up a rat and when you are at her house just download it to her pc when she is not around.

You probably don't have a girlfriend otherwise you shouldn't have to spy on her.

Just set a RAT up in her room.

You'll find more information about this in the [RAT section](#).

Simply install a remote controle ratt on her computer which has a web-cam catch and screenviewer, since you only want 1 log you can get blackshades ratt free package trial which has all the features but can only hold up to 5 slaves.

Hot gfs never watch porn on their PC, they do it with you, film and show it to friends.

yourihackz - September 11, 2012, 8:33 am

i can send it too to you @don2 hehe, but i dont only use it for my gf .. i wanna use it for other things to but can i rename the .exe file to .img but with the same working ?
