Unique Stubs Are available now
1 stub = 8\$

Note : Stub is included in the builder so dont worry to finid the stub.
When you pay for the unique stub will be give you Builder with unique stub which also have HWID.

To avoide avara just change the icon of the server and from other change the assembly to make it full FUD

Say Thanks If you Like this

Some of the shittiest code I have seen in a long time. This file is 5mb of CRAP. Here's form 1 of it (8 or 9 forms in total);

<http://pastebin.com/nRCK4YBG>

I warned you that if you kept going I'd post it. I'll post the rest in an sln file if you mouth off after this aswell. Protect your fucking code next time.

hmmm nice go and try it out and over 30 download at this time may be increase dude

dnsm - February 24, 2010, 11:43 am

Ok I have tried it, seems cool - thanks!

Ziko - February 24, 2010, 11:45 am

Hmm looks good but ye its INFECTED!
i dont download
msgtoshort
But ye if you can get it clean i will

Zeon - February 24, 2010, 11:50 am

Your AV detects it as a virus because it IS a virus, its MEANT to be a keylogger for you to infect people with. Noob!

Saroya.Jutt - February 24, 2010, 11:51 am

you know it got detected caz its contain public stub not PVT STUB. for complete FUD buy its PVT STUB
simple dude

LSDCOMMANDER - February 25, 2010, 11:23 am

just restore you system to last date simple

lordyarox - February 27, 2010, 8:53 am

System restore? Would that completely remove it, and if so is that the only way to get rid of the logger?

Saroya.Jutt - February 27, 2010, 8:54 am

Whats a "server pumper"? And what does "delete firefox do"? Clears saved logins?

Saroya.Jutt - February 27, 2010, 7:41 pm

server pumper = to make the server size bigger

delete firefox = will delete firefox from the PC

I completely agree with this statement. (Sadaf)'s keylogger has one of the worst possible codes out. Why is it detected? That is simply because he uses publicly released code from coding forums. He barely understands how to use half of these codes without a tutorial as well as it seems he has not given credits to those that deserved it. Another thing about (Sadaf) is that he tried to infect other members of HF via MSN, which is greasy as shit. I hoped I did not have to say this, but after seeing you post this garbage, and actually ask members to pay you \$8 for a unique stub just set me off.

lordyarox - February 28, 2010, 1:31 am

Is the program infected? Aka if I used it am I keylogged?

noob1243 - February 28, 2010, 7:35 am

hey, im a noob and this is my first time using a keylogger. i am have trouble sending it in an email. got and tips?

Wellbloud - February 28, 2010, 7:56 am

Great, first keylogger that works for me! thx

EDIT: Found by ESET, AVAST not

Omerta - February 28, 2010, 3:24 pm

What is the size of the server?! Beside, thanks for the share.

fallentheo - February 28, 2010, 3:33 pm

Its a nice program, but it doesn't work if they delete the .exe that they downloaded, which most people do when it turns out that it doesn't work, they think it is corrupt and they trash it, and there goes your keylogger. Idk why it doesn't copy itself somewhere when it is run, but as soon as they deleted the .exe I stopped getting logs.

hmm ok let me say you that its may be true and may not caz i still receving daily over 2000 mail in my all mail accounts.

so how can i say that it will not send the mail if they delete .exe....?

Mr Punisher - April 1, 2010, 9:17 am

thnx man but does it works with all os (7.vista)

Kuuba - April 1, 2010, 9:40 am

Very nice keylogger :) Using it .

dammic2000 - April 1, 2010, 12:28 pm

dosent send logs when opened .. wtf ... i tested whit test button worked , but when my friedn opened it , no logs wtf....

ninja09 - April 3, 2010, 12:42 am

the server not running at startup..coz there is no box for startup setting...
