Thread: [I need help stealing a cookie.](#)

limera1n - September 14, 2012, 8:05 pm

Ight, so they're a site called 'roblox.com'; everyone has a cookie named ".ROBLO SECURITY" which contains a value of they're encrypted version of they're PW, I need some program that, when they run it, will send me the ".ROBLO SECURITY" cookie value.

Help? thanks!

?

Sorry, didn't explain it good, let me start over.

Every user has a cookie called ".ROBLO Security" which contains the encrypted version of the Password.

i need some program that'll send me the value of this cookie to my email

There's one. Don't ask me how to decrypt it

LevelUp - December 24, 2012, 9:50 am

Find an XSS vulnerability then create a cookie stealer script and put it on free-webhosting.

Then link the admin a shrunken/Hexed URL which will paste the cookie to a .txt when he clicks on it.

CaptainCaribbean - July 14, 2019, 1:03 pm

You don't need to decrypt it just copy the code and replace the value of it with your own

joak1ng0 - July 29, 2019, 12:09 am

try to use mozilla and download some cookie extractor, and be happy
