Thread: [\[ANDROID\] Call of Duty Black Ops Zombies v1.0.2 \[APK\] \[TUT\]](#)

pubmaster - September 15, 2012, 6:49 am

The Call of Duty: Zombies phenomenon has risen back to life.

Adapted from the best-selling console hit and built specifically for tablets and smartphones, Call of Duty: Black Ops Zombies delivers fan-favorite, heart-pounding maps: Kino Der Toten, Ascension, and Call of the Dead: Director's Cut, as well as "Dead-Ops Arcade," a 50-level zombie gauntlet that provides the ultimate undead challenge for fans of Call of Duty's signature zombie warfare.

Play solo or join a team of up to 4 players via Wi-Fi as you mow down hordes of zombies using a variety of weapons and perks only available in the Call of Duty zombie experience.

Players can also opt to enhance their experience and get out of a jam with the in-game CoD Point System. With six tiers of in-app purchasing options to choose from, Zombies fans will be able to take their experience to a whole new level by unlocking additional areas and securing better weapons in much less time. Please note that CoD points are only applicable in single player.

Buy CoD points in the Main Menu to use when you run out of earned points in-game.

CoD points can be spent on anything in the game such as reviving, opening doors, weapons, perks, and the mystery box but are only used when you do not have enough earned points.

Revives can also be bought with CoD points if you die without the revive perk, although the three revive limit still applies.

Note: Your CoD points will be lost if the app is uninstalled from your device.
