Hey guys, I just rediscovered the album Infinite, by eminem, Just wondering on your thoughts of eminem then and now, Personally I hated recovery, and anything past that point, relapse was a stretch in itself, but this older stuff is great.

I think recovery was a very good album. There was a massive patch between is late 1990's gear to about 2007, then till now. I think before recovery songs like mockingbird and when im gone were the last we'd see of shady.

The quality of Infinite sucks but yeah there were some sick verses but my favorite album will still be Relapse. Even though Relapse got so much hate I just love it.

Eminem is really a terrible rapper. He is really bad, he has no flow, just a style. Infinite was a pretty good album even if he was rapping about stupid stuff, everything passed Infinite was bad, all the LPs, the Eminem Show, they all sucked.
