Thread: [\[TUT\]{EASY}\(PICS\)?How to set up a keylogger?\(PICS\){EASY}\[TUT\]](#)

Pops - September 16, 2012, 6:25 pm

Are your friends bothering you? Need to get back at someone? Or do you just want to learn some of the basics of hacking accounts? In any case, this thread will be INCREDIBLY useful to you.

First of all, heres what this method will require and what it will involve:

- Computer (duhh)
- Internet connection
- Keylogger, we will be using one called SysLogger
- Target
- Making a fake program that the target will want to open
- An email (preferably a Gmail)

So, lets get started.

First thing you will need is SysLogger. You can download it at the bottom of the thread.

Open it up. You will be given a message, just click 'OK'.

It should open up the GUI.

Tick the following boxes:

- Encrypt email
- Stealers
- Delete cookies
- Block AV sites
- USB spread
- Startup
- Kill Taskman (optional, leave blank if you want this to be more stealthy)
- Force steam
- Clipboard logger
- Screen logger

Those options will do the following:

Stealers = Sends you saved passwords for internet browsers

Block AV site = Stops the victim from checking an antivirus site if they get suspicious

USB spread = Infects any USB devices plugged into the machine, so if they are put into other computers they will infect them

Startup = Runs the keylogger every time the machine is switched back on

Kill Taskman = Stops the victim opening task manager

Clipboard logger = Saves anything copy/pasted
Screen logger - Sends you a screen shot of the victims PC

Next we have to tick the box called 'Enable Error'. This will give the victim an error message when they open the file, make sure you put in something creative, but relevant the fake program.

Click 'Test Error' to make sure it is working.

Now we need to fill in the mailing options. I recommend using mail as opposed to FTP because it is more secure and its a lot easier. Put in your email address and password. If you are using a Gmail you don't have to change the 'SMTP' options, if you aren't google the SMTP options for your email provider. Click 'test email', if a box pops up saying success, you've done everything right, if not, go back and do it again. There should be a box below that which says 'Interval'. Set that to whatever time you want.

Now click 'Change file properties'. This will open up another GUI. Find an icon that suits your fake program [here](#)

The icon changer might not work for everyone. If it doesn't, download a free icon changer from google.

Close the properties window.

Click 'Build Server'. This will build the keylogging file. Make sure you have your antiviruses disabled as they will delete the file. You can reactivate them when you are done.

Congrats, you've built the keylogger!

Now all you need to do is send it to your victim and get them to open it!

If you accidentally open your keylogger, just open up SysLogger and click 'Cure'. Type in the name of the file and you will be cured.

[CLICK HERE TO DOWNLOAD SYSLOGGER](#)

I hope you guys find this useful!

If you do, please post a thanks.

Hope this helps you guys,

Lethalnz

Ares23 - September 16, 2012, 6:29 pm

Very good tutorial! Thank you for this!

I will give it a try as soon as possible, and I will come back with any questions ;)

You're welcome!
Glad this helped you out!

Unacknowledged - September 16, 2012, 7:10 pm

Very nice tutorial OP. But 1 question. Is the stub FUD?

Pops - September 16, 2012, 7:21 pm

(Sep 16, 2012 07:10 PM)???Ryder???™ Wrote: [\[CITE\]](#) Very nice tutorial OP. But 1 question. Is the stub FUD?
It's not FUD, just UD, but still most anti-viruses don't pick it up.
It still serves its purpose if you bind/crypt it or use it with a JDB.

evolutionroh - September 16, 2012, 9:44 pm

nice tutorials !!!! thanks for sharing

Paul Walker - September 17, 2012, 1:42 am

I'm mainly just here to read it. But I couldn't seem to find the download link for the SysLogger. Not sure if you're just forgotten to add it or whatever. Just thought I'd let you know :)

Thanks
-Paul

Oh god. Well that's really a screw up.
Thanks for letting me know!
I'll update the thread now.

txrancher - September 17, 2012, 7:57 am

Thank you for sharing i will try and follow along.

W32- - September 17, 2012, 8:00 am

Wow thanks will be using this very soon!

romka - September 17, 2012, 12:14 pm

Thanks bro It is very Cool! Thanks!

It's ok, I'm glad you liked it!

:)

Godzg1ft4ya - September 17, 2012, 7:49 pm

Thanks for the tutorial, good info. I will try this when i get a chance

Harold Finch - November 4, 2012, 8:56 am

can you add me on skype and help me to set up the file properties? i always get error messages. would be great. anyway good and cool tutorial :) skype: ychnach

SlayerBot - November 4, 2012, 11:40 am

Sorry im new but how do i see there details etc of the things they fill in? Like skype username?

seydor - November 6, 2012, 1:53 am

Bro please I need you to help me build a keylogger attach to jpeg file, give me your ICQ for better communication. thanks

Applejuices - November 6, 2012, 2:50 am

There is a easier way, but this is nice too ;D

ExiteD - November 6, 2012, 2:52 am

This is nice ! thanks you i sas needing it :)

xXweedzXx - November 6, 2012, 5:21 am

My anti-virus blocked it because its says that its a trojan 0_0

Oguoda - November 6, 2012, 7:04 am

(Nov 6, 2012 06:21 AM)xXweedzXx Wrote: [\[CITE\]](#) My anti-virus blocked it because its says that its a trojan 0_0

You're downloading a keylogger and you're surprised your anti-virus blocked it? sigh

To OP, nice guide, found it very helpful. Simplistic but helpful.

samrokzz - November 6, 2012, 8:01 am

Nice tutorial ,

Thanks for the share .

Pops - November 6, 2012, 11:01 am

(Nov 6, 2012 06:21 AM)xXweedzXx Wrote: [\[CITE\]](#) My anti-virus blocked it because its says that its a trojan 0_0

Correction: your AV blocked the stub you created because it isn't FUD.

youga - November 6, 2012, 2:12 pm

Thank you very good I'm very happy I love, thank you
Thank you very good I'm very happy I love, thank you

djcooler123 - February 2, 2013, 2:50 am

hey just a question do i receive my key-logs from the infected person through my email and do i need to re create my file and do everything again if i x the application thanks.

ngangsiaa - February 2, 2013, 3:38 am

nice post i think i must get this try
i try to download but had an error message

Site Offline

HackForums.net for one reason or another didn't load. We might be offline, we might have a site error, or maybe just a serving error with our complex setup. In most cases wait a minute and refresh and we'll be back online.

Sorry, hackforums.net is currently unavailable. Please try again soon.

smekko1 - February 20, 2013, 4:09 am

I'm new at this... Where does the information goes to? :) Please answer

waqasswedens - February 20, 2013, 4:17 am

Thank You For This Great Tutorial . I Will Try This Soon.

mtrax - February 20, 2013, 5:04 am

i did everthing but how am i supposed to know if they opened the file? do i receive any notifcation?

rapouqui - February 20, 2013, 2:15 pm

do you have a script to advice to me ?

Angrytaco - May 2, 2013, 5:32 pm

Thanks for the TuT, I accidentally opened the .exe file when I was trying to move it, could you explain more to me about the cure and what I should type?

SkittleTastic - May 8, 2013, 2:39 pm

Pops, thank you for this great TuT! I like all your threads :D

Alterations - June 26, 2013, 9:30 am

THanks Pops! This is a really easy program to set up! Got 15 MC accounts!!!

ProcraftHD - June 27, 2013, 10:23 am

Quote:[TUT]{EASY}{PICS}?How to set up a keylogger?(PICS){EASY}[TUT] Weres the tutorial bit?
cos i would like to know how to make one ???

Murkerrr - June 27, 2013, 12:24 pm

Where are the keylogged infos sent? to the email?

Gonzo. - June 27, 2013, 12:29 pm

Great! Thanks for it bro! ?

characters:ppp

dxgamehhh - July 25, 2013, 10:25 am

This is a nice share ! Thanks mate and keep up the good work

ClaaSICs - July 25, 2013, 1:13 pm

I went threw 3 of my emails and of course i know the passwords to them well as i have checked them but i keep getting an error saying invalid username or password and this is gmail service, if u can pls either pm me on here or skype: Into.Your.Path

If you can help will mean a lot thanks :)

vaan - July 30, 2013, 5:37 am

IT SEEMS THAT THE SPREADER IS NOT WORKING

Jfyj99 - July 30, 2013, 11:04 am

i found the problem, it seems that it only works for gmail :/

ViR0 - July 30, 2013, 11:10 am

Looks like a great Tutorial, Thanks!

LEGOLINK1 - August 1, 2013, 1:00 am

it wont let me cure the logger could some one help me plz

mpdxd1 - August 1, 2013, 4:08 am

Thank you great tutorial, really nice

#R00T~ - August 1, 2013, 4:17 am

Pretty basic tutorial, but im sure it will help the noobs out.

soysauce - August 1, 2013, 1:59 pm

This looks TOO easy...lol. Thanks OP.

Hackerz93 - August 1, 2013, 5:53 pm

Thanks you for the tutorial ;) hihihihihhi

Thanks you for the tutorial ;) hihihihihhi

Chambo - August 3, 2013, 10:34 am

Can somebody help me to disguise the keylogger? I uploaded it to mediafire but mediafire detects a virus, and wont let people download the file. How can i get around this?

Ta-kun - August 3, 2013, 10:37 am

Thanks for this! Gonna give it a go a little later!

Johan Cruyff - August 4, 2013, 9:13 pm

Thanks for the tutorial :) i love it

mike_of_ss - August 4, 2013, 9:46 pm

quite useful thank you for beginners such as myself. thank you.

one question though. does this software have built in binding (idk if thats the right word) to a program. or would i have to use an additional program for that

Youthasaur - *August 5, 2013, 1:35 pm*

When I send it to a friend he opens it gets the error message but then how do I go onto his computer ETC. He knows I'm doing it BTW
