Thread: [SlyTaco's Bitcoin L33t/Ub3r Upgrade Shop](#)

SlyTaco - September 17, 2012, 8:18 pm

As you may already know, Omniscient does not provide an option to upgrade your HackForums account to L33t or Ub3r via Bitcoin. My service allows you to do that, for only \$1 more than the original price.

Prices:

L33t upgrade: \$20 via BTC

Terms:

You will go first.

Ub3r upgrade: \$24 via BTC

Terms:

You will go first.

You must be approved for Ub3r (Apply [here](#))

As soon as I receive the BTC, I will purchase the upgrade for you. It may take up to 24 to 48 hours for the upgrade to show up. If you are interested, please post here or private message me.

If you would like to expedite the process, you can send me BTC immediately to my address, and PM me your address after. Calculate how much to send with <http://preev.com>

Like The Mastermind said, you have to be upgraded to l33t before you can even apply for

Ub3r. Sorry for the inconvenience.
