Doxing

What is doxing you may ask, well doxing is short for the word 'documenting' meaning gathering all information on your chosen victim. Why dox someone? simple to inflict fear upon your chosen victim you can basically use a dox for anything you want whether it be getting what you want or just for straight up trolling. To get started you're going to want to have a documenting format you can either have it written in a notepad or you can do what I do and have a program neatly organize all the information and when finished place it into a notepad. This is a program I use when documenting it was written in batch by my friend DoorThief [Download](#) Usernames/Alias's If you know the person you're choosing to document because you met him online chances are you can easily find out a lot more about them using a simple google search of their username and the game and or platform you found them on. EX: Creatious Minecraft or Acceptation PS3 with these searches it's quite easy to find out the person you are trying to document's name. Social Networking Once you have their name its pretty easy to find out where they live what their number is and what their parents name is, take that first and last name to Facebook and most of the time they'll have their parents listed as 'Father' 'Mother' and their siblings listed as 'Brother' 'Sister' and with this information you can take it to the search websites listed at the bottom of the thread

Address & Phone Number If you haven't found their parents name your next best bet is to get their IP Address and to get that you can either go to <http://whatstheirip.com/> enter your email and send them a link or if you have their Skype use a Skype IP resolver once you get their IP go to <http://ipaddress.com> and you will be able to find out what country and state they're located in. However if you do happen to have their parents name you can easily find their address by conducting a search on the websites listed at the bottom. Websites & Premium Membership

<http://www.tineye.com/> I myself have a premium Beenverified account and to get one all you need

is a Pre-paid credit card then you sign up for the 14 day week trial and start using. The credit card will not get charged as it has insufficient funds. How to not get documented First you should know that no one is "Un-doxable" you can only make it a lot harder for the person documenting you to find out your legitimate address and phone number and to do so you must confuse the documentor by giving him a bunch of fake names don't ever apply for something on a forum you're not familiar with and enter your real name that is a big ? use a completely different name/age for everything you sign up for and to top it off use a @mail.com account as those are harder to get information on.

Conclusion If you feel you deserve credits and or are in need of help with something feel free to PM me if you feel I've missed something do not be afraid to tell me so.

Well,

Fumbles's documentor is a heck of a lot better than yours.

Oh wait, you copied his.

Nice job.

Other than that, GREAT POST!

Stay HQ mate.

Phurion - September 17, 2012, 11:16 pm

Yeah I would use Fumbles but we added things that we didn't want public so I added DoorThiefs documentor instead.

This documenting tool was made by Doorthief in batch and compiled to .exe

He made it to show mine up, then I made one in a c#.

OT: Nice tutorial, should help Magma a little.
