Anarkhos - September 18, 2012, 12:00 pm

I iz jelly. Hope you were the first one to report it. Since there rewards are so high there's probably allot of people looking for vulns.

Tello - September 18, 2012, 12:33 pm

What can ya do with the XSS Scripting?

Like hacking people or w.e?

Anarkhos - September 18, 2012, 12:42 pm

(Sep 18, 2012 12:33 PM)Tello Wrote: [\[CITE\]](#) What can ya do with the XSS Scripting?

It depends if it's persistent or non-persistent.

You cant do much with non-persistent apart from local stuff (still considered a vuln though)

If its persistent well you can redirect page to your deface, steal session cookies.

Hum the vuln OP found is most likely non-persistent though, but hey maybe he struck DIAMOND and is getting ALLOT of \$.

SatanTheGod - September 18, 2012, 2:29 pm

I found a non persistant XSS recently, reported it and i got 500. But i still haven't gotten any money into my account yet.

Sonic Boom - September 18, 2012, 3:16 pm

Got a reply from google.

Not happy,

Quote:Hi Will,

We appreciate the detailed report. Unfortunately this issue was previously submitted to us by another user and we are just putting the finishing touches on our fix. Unfortunately as this is a duplicate of a previously known issue it does not qualify for the VRP.

Regards,
Kevin

EDIT!

I herd back from them again recently, they stated i am now in fact illegible ^.^
They made a mistake.

Not happy,

Ouch.

Them bitches probably lying though and just telling you that somepony else already reported it to them.

Dr Plague - September 22, 2012, 12:40 am

If I was you I'd rage.

I was reading this thread then you get bad reply. --

vehla - September 22, 2012, 2:08 am

Same Happened with Me.

Quote:Thanks for your email.

I've filed a bug and will get back to you once I've got more information. At first glance, this might not be severe enough to qualify for a reward, though the panel will take a look and let you know once they've made their decision.

Regards,
Gynael, Google Security Team

I was so happy... But then-

Quote:Hi,

I've just noticed that we've already received prior notice about this issue, so unfortunately, your report is a duplicate of an existing issue. Since we already have a bug report on file, it isn't eligible for a reward.

Kind regards,
Gynael, Google Security Team

I mean wtf? If you have received it before also then why didn't you fixed it yet? ?

SuaveSalmon - September 22, 2012, 2:11 am
