So far, I've tried .exe and .jpg/png and it worked fine.

Lou Cypher - September 18, 2012, 7:28 pm

Sorry for the lack of understanding, so with file binder how does it work. So i can send a .jpg that runs a .exe when the .jpg is opened?

It's a .exe that has a .jpg in it. What you're talking about is a ext. changer with a binder.

Yeah new thread!

Advanced™ its the fastest guy replying pm's on HF, so as for support...the best there his!

The crypter its simple to work, clean with all the features that whe want on a crypter (binder,icon,assembly,custom injection,several encryptions etc)

And the site its really nice and professional, worked like a charm!

So vouch for Advanced™ and Cybershield!

Here are the Problem Solving Step's you must do:

INSTRUCTIONS FOR DOWNLOAD AND INSTALL

You will need to log in to the client area and download Cyber Shield by going to: Services tab in the menu bar > My Services > View Details > Downloads, and then download Cyber Shield.

After you have downloaded Cyber Shield, you will then need to open a ticket stating you need a license key. We will then shortly reply back to the ticket with your license key.

YOU MUST PROVIDE A SCREENSHOT THAT YOU HAVE CONFIRMED THE RECEIPT FOR THIS TRANSACTION!

Once you obtain your license key, you will need to create an account with .Net Seal, make sure to check your spam for the confirmation email. Then after you have confirmed the account for .Net Seal you will need to log in. Once logged in, hit redeem serial code and paste the code we have provided. Then hit continue and the program will then start.

Advanced - September 19, 2012, 6:28 am

I've sent you all your code.

Hi Mate,

I purchased this about an hour ago, followed the instructions, i confirmed receipt of product etc, gone on the website, and the download link says the file is not found.

can you re-upload / send me a working link for the download.

Just would like to know what crypter you are using as i have seen your posts around and i though ?
Infinity Crypter v4 ? was a better crypter Your input would be much apprehended. ?

I hope this is not a Faulty product like the last one i had by him never worked even after countless
Pm's to him he just ignored me i hope his partner in crime will pull him into line I'm yet to see any
change with his dealing with people as i have spoken to a few people about him and he's not a very

I'm glad to announce that the release of Cyber Shield v2 will be this month. With that said, I'd like to

acquaint everyone, especially my existing customers with the details about the upcoming release. Before I precede, let me state that my intention is to release version 2 before Halloween. I guess this could be considered my "treat".

--

What changed?

I'm glad to announce that this update will be a completely renovated Cyber Shield. Now let's begin with the changes, I've removed the assembler due to too many people getting generic detections & in turn misunderstand and blame it on the crypter. The icon changer, however is mandatory and is still intact. Version two introduces a new RunPE that is much more stable. The new storage method completely bypasses Avira. Cyber Shield v2 now features USG & codedom. All bugs & errors have now been fixed. I've simplified the crypter down so that it's click, click, & done. I've included all the core features that is mandatory for a crypter to function. Now supports unicode & EOF.

--

Will prices be changed?

Not necessarily, prices will still be the same. However, there will be limited copies; only 29 copies will be sold with the exclusion of the 9 lifetime licenses.

Wtf i asked your bit-coin wallet address and you dint reply i told you i dont have anything in my LR .
how can i send you 0.2\$? Advanced here is the payment proof bro
<https://gyazo.com/68c47bac27f65ab4e3e4824466b24fc5> can you tell me your bitcoin adress please
i dont have 0.2\$ in my LR right now , but give me my licnece so i can earn and then i can give you
0.2\$ bro please understand its only 0.2\$, i send you 19.80\$ that all i got right now , please bro give
the licence

Advanced - January 31, 2013, 1:35 pm

Give me some time while I sort all the issues out.

Advanced - February 3, 2013, 12:12 pm

I've recently been dealing with medical issues as well as some personal issues IRL. I apologize for not doing anything to Cyber Shield for the past two weeks. If your license has expired within that time frame, message me with your username and I will grant you an extra month.

I'm working on getting the site back up & starting up a customer support team again. Give me some time and things will be back to normal in no time.
