15 download till now
and just 1 post
omg!
say thanks pls, and make the thread alive

Conlaoch - September 19, 2012, 10:17 am

you have 35 posts no reputation. I realize this is only a sauce but whats the point there are hundreds of vb.net free sauces

It seems like res.exe and ChangeMe.exe is missing... And where is the stub? Am I missing something here? Or did you forget to include the source to the stub?

OP seems like a kind guy, tho. But I confirm It's good to look around and get experience before posting stuffs like this. It's a source, so I can understand you don't want to infect us (atleast I'm trust in it). But It's helpful to see what community exactly wants from you and what projects that we need.

Thank you for posting!

Oh, and a bit building critics. Skin is a bit *khm*. I prefer dark, elegant skins. It's ONLY my personal opinion, just sayin'.
