Thread: [nevermind my question was answered](#)

Hobbyist - September 20, 2012, 12:52 pm

I just got this whilst opening Hackforums. (Im a computer noob when it comes to viruses and stuff...)
[img]http://speedcap.net/img/e2b257ca2579afe08f005f8d6ee980da/6a1a34bb.png[/img]

Should I be worried? I'm running a scan now with clamxav. im on a mac.

Thanks.

Herbert - September 20, 2012, 12:54 pm

Got that a couple of time it's probably the anti PM spam system :)

Tiszy - September 20, 2012, 12:56 pm

This is a system to prevent spamming bots and DDoSing, etc. You shouldn't worry, I get that too very often.

Miki - September 20, 2012, 12:57 pm

You should not, its to prevent HF from being DDosed/ from countries with high "Black hat" activity %.

Pocky - September 20, 2012, 12:59 pm

Nah you're okay bro. It's cloudflare's system that detects "spam."
You're good bro. ?

Hobbyist - September 20, 2012, 12:59 pm

Phew...lol Thank you all for the help! :)

xtraesp - September 20, 2012, 1:03 pm

I haven't gotten that at all today so far.

Once I forgot to disable my proxy then tried accessing hf and got that.

Do you mind closing the thread? People can't read that you've answered that everything is ok ^^
:)

success = true - September 20, 2012, 1:34 pm

This actually happens to me sometimes aswell, I still don't know what it does.
